

CITATION REPORT

List of articles citing

Morphogenesis and cytopathic effect of SARS-CoV-2 infection in human airway epithelial cells

DOI: 10.1038/s41467-020-17796-z
Nature Communications, 2020, 11, 3910.

Source: <https://exaly.com/paper-pdf/75822262/citation-report.pdf>

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 23 Airway Epithelial Cell Junctions as Targets for Pathogens and Antimicrobial Therapy. **2022**, 14, 2619 ○
- 22 SARS-CoV-2 evolves increased infection elicited cell death and fusion in an immunosuppressed individual. ○
- 21 SARS-CoV-2 Spike Protein Mutation at Cysteine-488 Impairs Its Golgi Localization and Intracellular S1/S2 Processing. **2022**, 23, 15834 ○
- 20 Whole patient knowledge modeling of COVID-19 symptomatology reveals common molecular mechanisms. 2, ○
- 19 Mucociliary transport deficiency and disease progression in Syrian hamsters with SARS-CoV-2 infection. **2023**, 8, ○
- 18 Pathophysiology of SARS-CoV-2 Infection of Nasal Respiratory and Olfactory Epithelia and Its Clinical Impact. 1
- 17 Efficacy and safety of metabolic interventions for the treatment of severe COVID-19: in vitro, observational, and non-randomized open label interventional study. 12, 1
- 16 Impacts of viral pathogenesis and vaccine immunization on the host humoral immune response in SARS-CoV-2 and associated variants of concern (VOCs) infection. **2023**, 237-262 ○
- 15 Uncovering strain- and age- dependent differences in innate immune response to SARS-CoV-2 infection in nasal epithelia using combined short and long-read scRNA-seq. ○
- 14 Mucociliary Clearance Augmenting Drugs Block SARS-Cov-2 Replication in Human Airway Epithelial Cells. ○
- 13 An inhaled bioadhesive hydrogel to shield non-human primates from SARS-CoV-2 infection. ○
- 12 SARS-CoV-2 leverages airway epithelial protective mechanism for viral infection. **2023**, 26, 106175 ○
- 11 A novel antiviral formulation containing caprylic acid inhibits SARS-CoV-2 infection of a human bronchial epithelial cell model. **2023**, 104, ○
- 10 Mucociliary clearance augmenting drugs block SARS-CoV-2 replication in human airway epithelial cells. **2023**, 324, L493-L506 ○
- 9 Molecular mechanisms of human coronavirus NL63 infection and replication. **2023**, 327, 199078 ○
- 8 BA.1, BA.2 and BA.2.75 variants show comparable replication kinetics, reduced impact on epithelial barrier and elicit cross-neutralizing antibodies. **2023**, 19, e1011196 ○
- 7 Cell Surface Nucleocapsid Protein Expression: A Betacoronavirus Immunomodulatory Strategy. ○
- 6 Cellular and Molecular Mechanisms of Pathogenic and Protective Immune Responses to SARS-CoV-2 and Implications of COVID-19 Vaccines. **2023**, 11, 615 ○

- 5 SARS-CoV-2 Is More Efficient than HCoV-NL63 in Infecting a Small Subpopulation of ACE2+ Human Respiratory Epithelial Cells. **2023**, 15, 736
- 4 Neutrophilic inflammation promotes SARS-CoV-2 infectivity and augments the inflammatory responses in airway epithelial cells. 14,
- 3 Persistence of SARS-CoV-2 Antigens in the Nasal Mucosa of Eight Patients with Inflammatory Rhinopathy for over 80 Days following Mild COVID-19 Diagnosis. **2023**, 15, 899
- 2 Human airway ex vivo models: new tools to study the airway epithelial cell response to SARS-CoV-2 infection.
