

The role of financial development, tourism, and energy deficit: evidence from 20 highest emitting economies

Environmental Science and Pollution Research

27, 42980-42995

DOI: [10.1007/s11356-020-10197-1](https://doi.org/10.1007/s11356-020-10197-1)

Citation Report

#	ARTICLE	IF	CITATIONS
1	The determinants of environmental quality in the SAARC region: a spatial heterogeneous panel data approach. <i>Environmental Science and Pollution Research</i> , 2021, 28, 6422-6436.	2.7	110
2	Dynamic relationship between technological innovations, financial development, renewable energy, and ecological footprint: fresh insights based on the STIRPAT model for Asia Pacific Economic Cooperation countries. <i>Environmental Science and Pollution Research</i> , 2021, 28, 15519-15536.	2.7	264
3	The dynamic linkage between globalization, financial development, energy utilization, and environmental sustainability in GCC countries. <i>Environmental Science and Pollution Research</i> , 2021, 28, 16568-16588.	2.7	159
4	Remittance inflows affect the ecological footprint in BICS countries: do technological innovation and financial development matter?. <i>Environmental Science and Pollution Research</i> , 2021, 28, 23482-23500.	2.7	160
5	The Impact of Tourism and Financial Development on Energy Consumption and Carbon Dioxide Emission: Evidence from Post-communist Countries. <i>Journal of the Knowledge Economy</i> , 2022, 13, 773-786.	2.7	26
6	Heterogeneous effects of remittances and institutional quality in reducing environmental deficit in the presence of EKC hypothesis: A global study with the application of panel quantile regression. <i>Environmental Science and Pollution Research</i> , 2021, 28, 37292-37310.	2.7	101
7	Unveiling the dynamic relationship between agriculture value addition, energy utilization, tourism and environmental degradation in South Asia. <i>Journal of Public Affairs</i> , 2022, 22, e2712.	1.7	59
8	Modeling financial development, tourism, energy consumption, and environmental quality: Is there any discrepancy between developing and developed countries?. <i>Environmental Science and Pollution Research</i> , 2021, 28, 58480-58501.	2.7	47
9	Will the development of the financial industry cause environmental pollution?. <i>Management of Environmental Quality</i> , 2021, 32, 1298-1316.	2.2	4
10	Synergy and Communication of IoT Industry Development Strategies in the Perspective of Low Carbon Economy. <i>Complexity</i> , 2021, 2021, 1-11.	0.9	2
11	Autocracy, democracy, globalization, and environmental pollution in developing world: Fresh evidence from <scp>STIRPAT</scp> model. <i>Journal of Public Affairs</i> , 2022, 22, e2753.	1.7	69
12	The effect of tourism development on the ecological footprint in Singapore: evidence from asymmetric ARDL method. <i>Current Issues in Tourism</i> , 2022, 25, 2500-2517.	4.6	12
13	A step towards sustainable path: The effect of globalization on China's carbon productivity from panel threshold approach. <i>Environmental Science and Pollution Research</i> , 2022, 29, 8353-8368.	2.7	60
14	The implication of technological innovation and tourism development on FDI-growth-environment nexus in Association of Southeast Asian countries: a simultaneity modeling analysis. <i>Energy Sources, Part B: Economics, Planning and Policy</i> , 2021, 16, 878-902.	1.8	14
15	Re-investigating the nexuses of renewable energy, natural resources and transport services: a roadmap towards sustainable development. <i>Environmental Science and Pollution Research</i> , 2022, 29, 13564-13579.	2.7	24
16	Do industrialization, economic growth and globalization processes influence the ecological footprint and healthcare expenditures? Fresh insights based on the STIRPAT model for countries with the highest healthcare expenditures. <i>Sustainable Production and Consumption</i> , 2021, 28, 893-910.	5.7	165
17	The role of remittance inflow and renewable and non-renewable energy consumption in the environment: Accounting ecological footprint indicator for top remittance-receiving countries. <i>Environmental Science and Pollution Research</i> , 2022, 29, 15915-15930.	2.7	37
18	Forecasting carbon emissions due to electricity power generation in Bahrain. <i>Environmental Science and Pollution Research</i> , 2022, 29, 17346-17357.	2.7	61
