

CITATION REPORT

List of articles citing

Optimal design of supply chain network with carbon dioxide injection for enhanced shale gas recovery

DOI: 10.1016/j.apenergy.2020.115334
Applied Energy, 2020, 274, 115334.

Version: 2024-04-09

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
20	Evaluating the spatiotemporal variability of water recovery ratios of shale gas wells and their effects on shale gas development. <i>Journal of Cleaner Production</i> , 2020 , 276, 123171	10.3	7
19	Techno-economic assessment of carbonate melt flue gas desulfurization process. <i>Computers and Chemical Engineering</i> , 2021 , 146, 107227	4	7
18	A closed-loop integration of scheduling and control for hydraulic fracturing using offset-free model predictive control. <i>Applied Energy</i> , 2021 , 302, 117487	10.7	2
17	Techno-economic comparison of amine regeneration process with heat-stable amine salt reclaiming units. <i>Energy Science and Engineering</i> , 2021 , 9, 2529	3.4	3
16	Deep neural network-based optimal selection and blending ratio of waste seashells as an alternative to high-grade limestone depletion for SOX capture and utilization. <i>Chemical Engineering Journal</i> , 2021 , 133244	14.7	4
15	Design and Evaluation of High-Temperature Well Cementing Slurry System Based on Fractal Theory. <i>Energies</i> , 2021 , 14, 7552	3.1	0
14	An overview on the enhanced gas condensate recovery with novel and green methods.. <i>Environmental Science and Pollution Research</i> , 2022 , 1	5.1	
13	The progress of enhanced gas recovery (EGR) in shale gas reservoirs: A review of theory, experiments, and simulations. <i>Journal of Petroleum Science and Engineering</i> , 2022 , 213, 110461	4.4	2
12	Multi-objective optimization of CO2 emission and thermal efficiency for on-site steam methane reforming hydrogen production process using machine learning. <i>Journal of Cleaner Production</i> , 2022 , 359, 132133	10.3	2
