

Comfort temperature and preferred adaptive behaviour UK higher learning environments

Energy and Buildings

211, 109814

DOI: [10.1016/j.enbuild.2020.109814](https://doi.org/10.1016/j.enbuild.2020.109814)

Citation Report

#	ARTICLE	IF	CITATIONS
1	Reliability of human environmental "sensors": Evidence from first- and third-person methods. Building and Environment, 2020, 186, 107303.	3.0	1
2	The influence of acclimatization, age and gender-related differences on thermal perception in university buildings: Case studies in Scotland and England. Building and Environment, 2020, 179, 106933.	3.0	45
3	A field investigation on adaptive thermal comfort in school buildings in the temperate climatic region of Nepal. Building and Environment, 2021, 190, 107523.	3.0	48
4	Heating behavior using household air-conditioners during the COVID-19 lockdown in Wuhan: An exploratory and comparative study. Building and Environment, 2021, 195, 107731.	3.0	19
5	Advancement on Thermal Comfort in Educational Buildings: Current Issues and Way Forward. Sustainability, 2021, 13, 10315.	1.6	33
6	Test rooms to study human comfort in buildings: A review of controlled experiments and facilities. Renewable and Sustainable Energy Reviews, 2021, 149, 111359.	8.2	32
7	A Review and CFD Case Study: The Effect of Temperature, Humidity, Aerodynamics on Corona Virus Transmission, Mitigation in Open and Enclosed Environments. Biomedical Journal of Scientific & Technical Research, 2020, 32, .	0.0	0
8	Assessment of the Indoor Environment in the Intelligent Building. Civil and Environmental Engineering, 2021, .	0.4	12
9	Thermal performance of energy-efficient buildings for sustainable development. Environmental Science and Pollution Research, 2022, 29, 51130-51142.	2.7	16
10	Brain Response and Reaction Time in Natural and Comfort Conditions, with Energy-Saving Potential in an Office Environment. Energies, 2021, 14, 7598.	1.6	1
11	Interaction between Thermal Comfort, Indoor Air Quality and Ventilation Energy Consumption of Educational Buildings: A Comprehensive Review. Buildings, 2021, 11, 591.	1.4	36
12	Analyzing the Time-Varying Thermal Perception of Students in Classrooms and Its Influencing Factors from a Case Study in Xi'an, China. Buildings, 2022, 12, 75.	1.4	7
13	Residential wintry thermal comfort and adaptive behaviors in a cold climate in Beijing, China. Energy and Buildings, 2022, 265, 111942.	3.1	10
14	Course timetable optimization for a university teaching building considering the building energy efficiency and time-varying thermal perception of students. Building and Environment, 2022, , 109175.	3.0	6
15	Thermal comfort evaluation in architectural studio classrooms " A summer study in a warm to moderate Indian climate. Indoor and Built Environment, 2022, 31, 2331-2365.	1.5	7
16	Thermal Comfort in the Design Classroom for Architecture in the Cold Area of China. Sustainability, 2022, 14, 8307.	1.6	5
17	Quantitative analysis of the influence of air temperature variability on thermal perception of Brazilian university students. Work, 2023, 74, 955-966.	0.6	1
18	Investigation on Summer Thermal Comfort and Passive Thermal Improvements in Naturally Ventilated Nepalese School Buildings. Energies, 2023, 16, 1251.	1.6	10
