

2020 Clinical practice guidelines for Acute coronary syndrome elevation

Russian Journal of Cardiology

26, 4449

DOI: [10.15829/1560-4071-2021-4449](https://doi.org/10.15829/1560-4071-2021-4449)

Citation Report

#	ARTICLE	IF	CITATIONS
1	Organization of lipid centers operation in the Russian Federation – new opportunities. Russian Journal of Cardiology, 2021, 26, 4489.	1.4	6
2	Diabetes mellitus and acute coronary syndromes. MÃ–Ã¼narodnij EndokrinologÃ–Ã¼nij Å½urnal, 2021, 17, 346-360.	0.4	0
3	Antithrombotic Management for Patients with Atrial Fibrillation Undergoing Percutaneous Coronary Intervention. Rational Pharmacotherapy in Cardiology, 2021, 17, 628-637.	0.8	0
4	Non-ST-segment elevation acute coronary syndrome in elderly patients and long-livers. Features of treatment. Literature review and case report. Russian Journal of Cardiology, 2021, 26, 4524.	1.4	2
5	Persistent risk of vascular complications and efficacy of prolonged dual antiplatelet therapy after myocardial infarction. Atherothrombosis, 2022, 11, 18-28.	0.3	0
6	The possibilities of using antiplatelet agents during and after COVID-19 disease. Results of the Expert Council meeting. Cardiovascular Therapy and Prevention (Russian Federation), 2022, 20, 3152.	1.4	0
7	An integrated approach for very high cardiovascular risk patients. Intermediate results. Russian Journal of Cardiology, 2022, 27, 4839.	1.4	3
8	Antithrombotic effect of different acetylsalicylic acid drug formulations: is there a difference?. Russian Journal of Cardiology, 2021, 26, 4734.	1.4	1
10	The possibilities of using antiplatelet agents during and after COVID-19 disease. Results of the Expert Council meeting. Russian Journal of Cardiology, 2022, 26, 4797.	1.4	1
11	Evaluation of the effect of the use of the drug ticagrelor in patients with acute coronary syndrome on achieving the target indicator – reduction of mortality from diseases of the circulatory system – in 2022-2024. Russian Journal of Cardiology, 2022, 26, 4819.	1.4	2
12	The prevalence of ischemic pattern of heart damage in patients with acute myocardial infarction depending on the presence of obstructive coronary artery disease: Magnetic resonance study. Sibirskij Å½urnal KliniÃ–skoj I Å¼ksperimentalnoË Meditsiny, 2022, 37, 77-86.	0.4	0
13	How to optimize treatment in patients with different forms of coronary artery disease. Meditsinskiy Sovet, 2022, , 273-279.	0.5	1
14	Molecular genetic markers of myocardial infarction in combination with type 2 diabetes. Russian Journal of Cardiology, 2022, 27, 4605.	1.4	1
15	Electrocardiographic, echocardiographic and lipid parameters in predicting obstructive coronary artery disease in patients with non-ST elevation acute coronary syndrome. Russian Journal of Cardiology, 2022, 27, 5036.	1.4	3
16	Experience with the use of combination antithrombotic therapy in a patient with acute coronary syndrome and underlying severe coronavirus infection. Atherothrombosis, 2022, 12, 60-68.	0.3	0
17	Parenteral anticoagulants in the treatment of acute coronary syndrome: what modern clinical guidelines say. Atherothrombosis, 2022, 12, 46-58.	0.3	2
18	Current views on antiplatelet therapy in acute coronary syndrome patients: the place of clopidogrel. Atherothrombosis, 2022, 12, 30-45.	0.3	0
19	Current guidelines for ß2-adrenoblockers use in cardiovascular diseases: focus on metoprolol succinate CR/XL: A review. Cardiosomatics, 2022, 13, 51-62.	0.4	1
