

CITATION REPORT

List of articles citing

Childhood maltreatment, prefrontal-paralimbic gray matter volume, and substance use in young adults and interactions with risk for bipolar disorder

DOI: 10.1038/s41598-020-80407-w
Scientific Reports, 2021, 11, 123.

Version: 2024-04-20

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
10	Cannabis use and resting state functional connectivity in adolescent bipolar disorder. <i>Journal of Psychiatry and Neuroscience</i> , 2021 , 46, E559-E567	4.5	2
9	Recent Perceived Stress, Amygdala Reactivity to Acute Psychosocial Stress, and Alcohol and Cannabis Use in Adolescents and Young Adults With Bipolar Disorder. <i>Frontiers in Psychiatry</i> , 2021 , 12, 767309	5	
8	Alcohol Use and Prefrontal Cortex Volume Trajectories in Young Adults with Mood Disorders and Associated Clinical Outcomes.. <i>Behavioral Sciences (Basel, Switzerland)</i> , 2022 , 12,	2.3	0
7	Genetic overlap between mood instability and alcohol-related phenotypes suggests shared biological underpinnings.		
6	Going beyond risk factor: Childhood maltreatment and associated modifiable targets to improve life-long outcomes in mood disorders.. <i>Pharmacology Biochemistry and Behavior</i> , 2022 , 215, 173361	3.9	1
5	Early life stress and substance use disorders: The critical role of adolescent substance use.. <i>Pharmacology Biochemistry and Behavior</i> , 2022 , 215, 173360	3.9	0
4	Peer victimization and associated alcohol and substance use: Prospective pathways for negative outcomes. <i>Pharmacology Biochemistry and Behavior</i> , 2022 , 173409	3.9	0
3	Examining the common and specific grey matter abnormalities in childhood maltreatment and peer victimisation. <i>BJPsych Open</i> , 2022 , 8,	5	0
2	Genetic overlap between mood instability and alcohol-related phenotypes suggests shared biological underpinnings.		0
1	Integrating biobehavioral information to predict mood disorder suicide risk. 2022 , 24, 100495		0
