Version: 2024-04-29

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
610	Dispersal, disease and life-history evolution. 2001 , 173, 35-53		69
609	Global Dynamics of Tuberculosis Models with Density Dependent Demography. 2002 , 275-294		4
608	A double epidemic model for the SARS propagation. 2003 , 3, 19		68
607	A Global Stability Criterion for Scalar Functional Differential Equations. 2003 , 35, 596-622		52
606	The shared wireless infostation model. 2003 ,		177
605	On Impulsive Beverton-Holt Difference Equations and their Applications. 2004 , 10, 851-868		66
604	From the ecological to the individual and back again. 2004 , 99, 1249-50; discussion 1252-4		9
603	The Analysis of Some Characteristic Equations Arising in Population and Epidemic Models. 2004 , 16, 441-453		1
602	Stochastic models in population biology and their deterministic analogs. 2004 , 70, 041902		120
601	Modeling the impact of periodic bottlenecks, unidirectional mutation, and observational error in experimental evolution. 2005 , 50, 645-62		14
600	A Mathematical Model for Invasion Range of Population Dispersion Through a Patchy Environment. 2005 , 7, 757-770		4
599	Reviews. 2005 , 112, 847-851		
598	A model of antibiotic-resistant bacterial epidemics in hospitals. 2005 , 102, 13343-8		109
597	Segmented file sharing with recursive epidemic placement policy for reliability in mobile peer-to-peer devices.		10
596	Reliable file sharing scheme for mobile peer-to-peer users using epidemic selective caching.		5
595	A MATHEMATICAL MODEL FOR SPATIALLY EXPANDING INFECTED AREA OF EPIDEMICS TRANSMITTED THROUGH HETEROGENEOUSLY DISTRIBUTED SUSCEPTIBLE UNITS. 2005 , 13, 151-171		2
594	Infectious Disease Informatics and Outbreak detection. 2005 , 359-395		7

593	Torus bubbling in a discrete-time predator-prey model. 2005 , 11, 431-441	2
592	Asymptotic behaviour of monotone multi-valued dynamical systems. 2005 , 20, 301-321	5
591	A Multi-Patch Epidemic Model with Periodic Demography, Direct and Indirect Transmission and Variable Maturation Rate. 2006 , 13, 153-177	20
590	A new networking model for biological applications of ad hoc sensor networks. 2006 , 14, 27-40	185
589	Pathogen Competition and Coexistence and the Evolution of Virulence. 2007 , 123-153	1
588	Resource allocation for restoration of compromised systems. 2006 , 12, 35-56	1
587	Generality of the final size formula for an epidemic of a newly invading infectious disease. 2006 , 68, 679-702	171
586	On the performance analysis of recursive data replication scheme for file sharing in mobile peer-to-peer devices using the HyMIS scheme. 2006 ,	2
585	A SIMPLE SI MODEL WITH TWO AGE GROUPS AND ITS APPLICATION TO US HIV EPIDEMICS: TO TREAT OR NOT TO TREAT?. 2007 , 15, 169-184	
584	Facing linear difference equations through hypergroup methods. 2007 , 13, 953-965	0
583	Unequal evolutionary rates in the human immunodeficiency virus type 1 (HIV-1) pandemic: the evolutionary rate of HIV-1 slows down when the epidemic rate increases. 2007 , 81, 10625-35	69
582	Modeling human activity in the spirit of Barabasi's queueing systems. 2007 , 75, 026102	28
581	Analyzing pathogen transmission in the dialysis unit: time for a (schedule) change?. 2007 , 2, 1176-85	9
580	Graph theory and networks in Biology. 2007 , 1, 89-119	231
579	Numerical integration of population models satisfying conservation laws: NSFD methods. 2007 , 1, 427-36	48
578	Epidemic Models for SARS and Measles. 2007 , 38, 246-259	4
577	Sustained oscillations via coherence resonance in SIR. 2007 , 245, 459-69	85
576	Stability techniques in SIR epidemic models. 2007 , 7, 2030063-2030064	2

575	Toward a multiscale model of antigen presentation in immunity. 2007 , 216, 93-118	59
574	On a nonautonomous SEIRS model in epidemiology. 2007 , 69, 2537-59	88
573	Population modeling of the emergence and development of scientific fields. 2008 , 75, 495-518	97
572	Optimal Spatial Harvesting Strategy and Symmetry-Breaking. 2008 , 58, 89-110	13
571	A mathematical model of a crocodilian population using delay-differential equations. 2008 , 57, 737-54	3
570	Dynamics in numerics: On a discrete predator-prey model. 2008 , 16, 163-182	2
569	Sampling and sensitivity analyses tools (SaSAT) for computational modelling. 2008 , 5, 4	75
568	Simulating the contamination of populations by a polluted environment. 2008 , 77, 257-265	
567	Systems biology of persistent infection: tuberculosis as a case study. 2008 , 6, 520-8	103
566	Mathematical Models of Influenza: The Role of Cross-Immunity, Quarantine and Age-Structure. 2008 , 349-364	8
565	The influence of infection control policies: A systematic study of the dynamics of an individual-based epidemic model with isolation. 2008 ,	0
