Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
976	Modal truncation of parabolic equations using the Galerkin method and inverse matrix approximations.		2
975	An asymptotically linear fixed point extension of the inf-sup theory of galerkin approximation. **1995**, 16, 345-361		5
974	The Approximation Problem for Drift-Diffusion Systems. **1995**, 37, 552-572		12
973	Preconditioning Complicated Finite Elements by Simple Finite Elements. **1996**, 17, 1269-1274		8
972	Two-Grid Discretization Techniques for Linear and Nonlinear PDEs. **1996**, 33, 1759-1777		469
971	Two-level additive Schwarz preconditioners for nonconforming finite element methods. **1996**, 65, 897-922		69
970	Finite modeling of parabolic equations using Galerkin methods and inverse matrix approximations. **1996**, 15, 631-648		2
969	An approximate factorization/least squares solution method for a mixed finite element approximation of the Cahn-Hilliard equation. **1996**, 13, 495-517		14
968	Two-level additive Schwarz preconditioners for plate elements. **1996**, 1, 658-667		3
967	Accurate stress extraction for nearly incompressible materials by the displacement formulation of the p-version FEM. **1996**, 12, 807-826		3
966	Multilevel Minimal Residual Methods for Nonsymmetric Elliptic Problems. **1996**, 3, 351-367		5
965	Analysis and computation of adaptive moving grids by deformation. **1996**, 12, 489-506		30
964	Hierarchical bases and the finite element method. **1996**, 5, 1-43		117
963	Numerical solution of the scalar double-well problem allowing microstructure. **1997**, 66, 997-1027		62
962	Convergence of the Combination Technique for Second-Order Elliptic Differential Equations. **1997**, 34, 2431-2455		19
961	Potential theory. **1997**, 17-66		2
960	Multigrid methods for the computation of singular solutions and stress intensity factors II: Crack singularities. **1997**, 37, 623-643		19

959	Abstract estimates of the rate of convergence for optimal control problems. **1997**, 36, 109-123	
958	Finite Element Methods for the Stokes System in Three-Dimensional Exterior Domains. **1997**, 20, 245-269	8
957	Numerical solution of viscoplastic constitutive equations with internal state variables Part I: algorithms and implementation. **1997**, 20, 1411-1425	4
956	Domain decomposition for a non-smooth convex minimization problem and its application to plasticity. **1997**, 4, 177-190	24
955	Analysis and convergence of a MAC-like scheme for the generalized Stokes problem. **1997**, 13, 147-162	36
954	FORMULATION OF GEOMETRICALLY NON-LINEAR PROBLEMS IN THE SPATIAL REFERENCE FRAME. **1997**, 40, 1263-1280	14
953	FINITE ELEMENT STRESS EXTRACTION BY THE COMPLEMENTARY ENERGY PRINCIPLE. **1997**, 40, 1335-1354	2
952	Almost regular Delaunay-triangulations. **1997**, 40, 4595-4610	10
951	Neuro-Dynamic Programming [Book News & Reviews]. **1998**, 5, 101-102	
950	Marangoni□□ard Convection with a Deformable Free Surface. **1998**, 145, 193-227	16
949	Error analysis of a weighted least-squares finite element method for 2-D incompressible flows in velocity□stress□pressure formulation. **1998**, 21, 1637-1654	9
948	Finite differences on triangular grids. **1998**, 14, 567-579	7
947	An a posteriori estimate for nonconforming finite element methods. **1998**, 78, 871-872	1
946	A Local Regularization Operator for Triangular and Quadrilateral Finite Elements. **1998**, 35, 1893-1916	131
945	Least-Squares Finite-Element Solution of the Neutron Transport Equation in Diffusive Regimes. **1998**, 35, 806-835	39
944	Overcoming Corner Singularities Using Multigrid Methods. **1998**, 35, 1883-1892	10
943	Tikhonov regularization and prior information in electrical impedance tomography. **1998**, 17, 285-93	343
942	A space-time finite element method for the nonlinear Schr□inger equation: the discontinuous Galerkin method. **1998**, 67, 479-500	97

941	A comparison of regularizations for an ill-posed problem. **1998**, 67, 1451-1472	54
940	The Adaptive Computation of Far-Field Patterns by A Posteriori Error Estimation of Linear Functionals. **1998**, 36, 251-274	68
939	Numerical Solution of a Flow-Control Problem: Vorticity Reduction by Dynamic Boundary Action. **1998**, 19, 829-860	62
938	Multiresolution volume data structure for shape modeling.	
937	Analytical Comparison of the Acoustic Analogy and Kirchhoff Formulation for Moving Surfaces. **1998**, 36, 1379-1386	352
936	Finite element approximation of parabolic hemivariational inequalities. **1998**, 19, 565-585	3
935	Computing optimal control With a hyperbolic partial differential equation. **1998**, 40, 266-287	10
934	A negative-norm least squares method for Reissner-Mindlin plates. **1998**, 67, 901-917	22
933	Optimal convergence for the finite element method in Campanato spaces. **1999**, 68, 1397-1428	6
932	Numerical investigation on optimal actuator/sensor location of parabolic PDEs. **1999**,	10
931	Canonical construction of finite elements. **1999**, 68, 1325-1347	107
930	Computational Error Estimation and Adaptive Error Control for a Finite Element Solution of Launch Vehicle Trajectory Problems. **1999**, 21, 1609-1631	7
929	Meshless Galerkin methods using radial basis functions. **1999**, 68, 1521-1532	173
928	Multilevel Boundary Functionals for Least-Squares Mixed Finite Element Methods. **1999**, 36, 1065-1077	14
927	A Least-Squares Finite Element Analysis for Diffraction Problems. **1999**, 37, 665-682	8
926	The Freedericksz transition as a bifurcation problem. **1999**, 14, 299-331	12
925	A nonstandard finite element interpolation estimate *. **1999**, 20, 245-250	
924	Two-grid Method for Linear Elasticity on Unstructured Meshes. **1999**, 21, 900-923	33

923	An Adaptive Finite Element Method for Problems in Perfect Plasticity. **1999**, 79, 143-146	3
922	On uniqueness for frictional contact rate problems. **1999**, 47, 275-296	10
921	Efficient fully-coupled solution techniques for two-phase flow in porous media. **1999**, 23, 199-216	71
920	Linear Formulation of a Distributed Boundary Control Problem. **1999**, 103, 385-399	0
919	Three-dimensional electrical impedance tomography based on the complete electrode model. **1999**, 46, 1150-60	244
918	Numerical analysis of a mixed elliptic problem with flux and convective boundary conditions to obtain a discrete solution of nonconstant sign. **1999**, 15, 355-369	2
917	Reproducing kernel hierarchical partition of unity, Part II—Applications. **1999**, 45, 289-317	85
916	Woven fabric composites—developments in engineering bounds, homogenization and applications. **1999**, 45, 1757-1790	48
915	The Maximum Angle Condition for Mixed and Nonconforming Elements: Application to the Stokes Equations. **1999**, 37, 18-36	63
914	Finite Element Discretizations of Elliptic Problems in the Presence of Arbitrarily Small Ellipticity: An Error Analysis. **1999**, 36, 368-392	15
913	Robust Convergence of Multilevel Algorithms for Convection-Diffusion Equations. **1999**, 37, 443-469	9
912	A Boundary Functional for the Least-Squares Finite- Element Solution of Neutron Transport Problems. **1999**, 37, 556-586	33
911	Fully Reliable Localized Error Control in the FEM. **1999**, 21, 1465-1484	71
910	Element-by-Element Construction of Wavelets Satisfying Stability and Moment Conditions. **1999**, 37, 319-352	89
909	A Space-Time Finite Element Method for the Nonlinear Schrödinger Equation: The Continuous Galerkin Method. **1999**, 36, 1779-1807	62
908	First-Order System Least-Squares for Elliptic Problems with Robin Boundary Conditions. **1999**, 37, 70-104	5
907	Error estimates for 3-d narrow finite elements. **1999**, 68, 187-200	21
906	Convergence of nonconforming multigrid methods without full elliptic regularity. **1999**, 68, 25-54	53

905	A posteriori error control in low-order finite element discretisations of incompressible stationary flow problems. **2000**, 70, 1353-1382	41
904	Adaptive Lagrange--Galerkin methods for unsteady convection-diffusion problems. **2000**, 70, 77-107	28
903	Convergence of a Galerkin method for 2-D discontinuous Euler flows. **2000**, 53, 786-798	7
902	Adaptive multilevel finite element solution of the PoissonBoltzmann equation I. Algorithms and examples. **2000**, 21, 1319-1342	223
901	Analysis of the Cell-Centred Finite Volume Method for the Diffusion Equation. **2000**, 165, 45-68	40
900	A piecewise linear Galerkin approach to stress analysis of nearly incompressible materials. **2000**, 16, 537-543	3
899	Steady Bingham fluid flow in cylindrical pipes: a time dependent approach to the iterative solution. **2000**, 7, 381-428	14
898	The first locking-free plane-elastic finite element: historia mathematica. **2000**, 190, 1323-1366	9
897	Locking-free adaptive mixed finite element methods in linear elasticity. **2000**, 190, 1701-1718	20
896	Parallel adaptive subspace correction schemes with applications to elasticity. **2000**, 184, 303-332	12
895	Analysis of a least squares finite element method for the circular arch problem. **2000**, 114, 263-278	8
894	Least-squares finite element approximations to the Timoshenko beam problem. **2000**, 115, 63-75	8
893	Adaptive finite element simulation of currents at microelectrodes to a guaranteed accuracy. ECE and EC2E mechanisms at channel microband electrodes. **2000**, 2, 576-585	17
892	Optimal control of a system governed by an elliptic partial differential equation. **2000**, 114, 173-187	3
891	Improved error estimation of dynamic finite element methods for second-order parabolic equations. **2000**, 126, 319-338	4
890	Adaptive finite element methods for compressible flow. **2000**, 190, 1137-1162	8
889	Finite elements for elliptic problems with wild coefficients. **2000**, 54, 383-395	8
888	The stationary phase error distribution of a digital phase-locked loop. **2000**, 48, 925-927	6

887	Adaptive Finite Element Analysis of the Anisotropic Biphasic Theory of Tissue-Equivalent Mechanics. **2000**, 3, 215-229		3
886	Convergence Analysis of a Numerical Method for a Mean Field Model of Superconducting Vortices. **2000**, 37, 911-926		3
885	Uniform Convergence and Superconvergence of Mixed Finite Element Methods on Anisotropically Refined Grids. **2000**, 38, 770-798		33
884	Adaptive Finite Element Methods for Optimal Control of Partial Differential Equations: Basic Concept. **2000**, 39, 113-132		207
883	Numerical Analysis of Time-Depending PrimalElastoplasticity with Hardening. **2000**, 37, 1271-1294		29
882	Least-Squares Mixed Finite Element Solution of Variably Saturated Subsurface Flow Problems. **2000**, 21, 1869-1885		16
881	Lower Bounds for Two-Level Additive Schwarz Preconditioners with Small Overlap. **2000**, 21, 1657-1669		16
880	Analysis of Expanded Mixed Finite Element Methods for a Nonlinear Parabolic Equation Modeling Flow into Variably Saturated Porous Media. **2000**, 37, 701-724		95
879	Finite Element Approximations to the System of Shallow Water Equations, Part III: On the Treatment of Boundary Conditions. **2000**, 38, 149-159		2
878	The Linearization Method for the Numerical Analysis of Finite Element Solutions to Quasi-linear Elliptic Partial Differential Equations. **2000**, 38, 227-266		2
877	A Posteriori and a Priori Error Analysis for Finite Element Approximations of Self-Adjoint Elliptic Eigenvalue Problems. **2000**, 38, 608-625		86
876	ConservativeP1 Conforming and Nonconforming Galerkin FEMs: Effective Flux Evaluation via a Nonmixed Method Approach. **2000**, 38, 660-680		23
875	Multigrid for the Mortar Finite Element Method. **2000**, 37, 1029-1052		35
874	Scattering of Time-Harmonic Electromagnetic Waves by Anisotropic Inhomogeneous Scatterers or Impenetrable Obstacles. **2000**, 37, 1590-1617		16
873	The Euler approximation in state constrained optimal control. **2000**, 70, 173-204		86
872	Numerical Analysis of Compatible Phase Transitions in Elastic Solids. **2000**, 37, 2061-2081		26
871	Adaptive wavelet methods for elliptic operator equations: Convergence rates. **2000**, 70, 27-76		269
870	A Comparison of Discontinuous and Continuous Galerkin Methods Based on Error Estimates, Conservation, Robustness and Efficiency. *Lecture Notes in Computational Science and Engineering*, **2000**, 135-146	0.3	11

869	Domain Decomposition Methods for Mortar Finite Element Discretizations of Plate Problems. **2001**, 39, 1097-1114		16
868	Spectral Approximation Orders of Radial Basis Function Interpolation on the Sobolev Space. **2001**, 33, 946-958		85
867	Solution Methods for the Poisson Equation with Corner Singularities: Numerical Results. **2001**, 23, 672-682		17
866	Multiplier Spaces for the Mortar Finite Element Method in Three Dimensions. **2001**, 39, 519-538		65
865	Error Estimates in Sobolev Spaces for Moving Least Square Approximations. **2001**, 39, 38-51		51
864	A Multigrid Method Based on the Unconstrained Product Space for Mortar Finite Element Discretizations. **2001**, 39, 192-213		22
863	On the Necessity and Sufficiency of the Patch Test for Convergence of Nonconforming Finite Elements. **2001**, 39, 363-384		38
862	A new computational approach for cortical imaging. **2001**, 20, 325-32		11
861	On the Numerical Modeling of Deformations of Pressurized Martensitic Thin Films. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2001**, 35, 525-548	1.8	7
860	Numerical Analysis of a Relaxed Variational Model of Hysteresis in Two-Phase Solids. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2001**, 35, 865-878	1.8	20
859	On the convergence of a linear two-step finite element method for the nonlinear Schr□inger equation. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2001**, 35, 389-405	1.8	29
858	Finite-element discretizations of a two-dimensional grade-two fluid model. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2001**, 35, 1007-1053	1.8	9
857	Two-grid finite-element schemes for the transient Navier-Stokes problem. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2001**, 35, 945-980	1.8	90
856	CONVERGENCE OF A DISCONTINUOUS GALERKIN SCHEME FOR THE NEUTRON TRANSPORT. **2001**, 30, 357-383		
855	Electrical process tomography with known internal structures and resistivities. **2001**, 9, 431-454		18
854	The space-time finite element method for parabolic problems. **2001**, 22, 687-700		1
853	Theoretical analysis of Nedelec□ edge elements. **2001**, 18, 321-333		5
852	Zur Behandlung des Elastizit□sproblems in Gebieten mit Ecken. **2001**, 81, 601-602		

851	Averaging technique for FE a posteriori error control in elasticity. Part I: Conforming FEM. **2001**, 190, 2483-2498		50
850	Adaptive mixed finite element method for Reissner Mindlin plate. **2001**, 190, 6895-6908		6
849	Locally constrained projections on grids. **2001**, 50, 549-577		15
848	Fixed-lag smoothing and state estimation in dynamic electrical impedance tomography. **2001**, 50, 2195-2209		20
847	Nonconforming Galerkin methods for the Helmholtz equation. **2001**, 17, 475-494		15
846	Pressure Stability in Fractional Step Finite Element Methods for Incompressible Flows. **2001**, 170, 112-140		161
845	Some superconvergence results for the covolume method for elliptic problems. **2001**, 17, 291-302		6
844	On the Existence of a Generalized Solution to a Three-Dimensional Elliptic Equation with Radiation Boundary Condition. **2001**, 46, 241-250		1
843	UNIFORM VALIDITY OF DISCRETE FRIEDRICHS' INEQUALITY FOR GENERAL NONCONFORMING FINITE ELEMENT SPACES. **2001**, 22, 107-126		8
842	AMLI Preconditioning of Pure Displacement Non-conforming Elasticity FEM Systems. *Lecture Notes in Computer Science*, **2001**, 482-490	0.9	3
841	Dynamic meshes for accurate polygonization of implicit surfaces with sharp features.		4
840	Residual-Based A Posteriori Error Estimate for a Nonconforming Reissner--Mindlin Plate Finite Element. **2002**, 39, 2034-2044		20
839	ANALYSIS OF LEAST-SQUARES APPROXIMATIONS TO SECOND-ORDER ELLIPTIC PROBLEMS. II. FINITE VOLUME METHOD. **2002**, 23, 433-451		1
838	Identification of coupled map lattice models of deterministic distributed parameter systems. **2002**, 33, 623-634		22
837	A Model-Based Fault Detection and Diagnosis Scheme for Distributed Parameter Systems: A Learning Systems Approach. **2002**, 7, 43-67		40
836	Discrete constant mean curvature surfaces and their index. **2002**, 2002,		22
835	A Variational Method for Recovering Planar Lam Moduli. **2002**, 7, 191-202		9
834	Finite Volume Methods for Elliptic PDE's: A New Approach. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2002**, 36, 307-324	1.8	53

833	A Fictitious-Domain Method with Distributed Multiplier for the Stokes Problem. **2002**, 159-174		10
832	Basics of PDEs and Level Sets. **2002**, 1-30		
831	ANALYSIS OF LEAST-SQUARES APPROXIMATIONS TO SECOND-ORDER ELLIPTIC PROBLEMS. I. FINITE ELEMENT METHOD. **2002**, 23, 419-432		4
830	Bending Moment Mixed Method for the Kirchhoff--Love Plate Model. **2002**, 40, 1632-1649		8
829	Nonconforming Finite Element Analysis for a Plate Contact Problem. **2002**, 40, 1683-1697		12
828	Error Analysis of a Finite Element--Integral Equation Scheme for Approximating the Time-Harmonic Maxwell System. **2002**, 40, 198-219		7
827	Least-Squares Galerkin Methods for Parabolic Problems II: The Fully Discrete Case and Adaptive Algorithms. **2002**, 39, 1648-1666		10
826	The $cal P^k+1-cal S^k$ Local Discontinuous Galerkin Method for Elliptic Equations. **2002**, 40, 2151-2170		8
825	A Robust Finite Element Method for Darcy--Stokes Flow. **2002**, 40, 1605-1631		146
824	Meshless approach to shape optimization of linear thermoelastic solids. **2002**, 53, 765-796		36
823	Convergence analysis of a hierarchical enrichment of Dirichlet boundary conditions in a mesh-free method. **2002**, 53, 1323-1336		20
822	A general and efficient formulation of fractures and boundary conditions in the finite element method. **2002**, 54, 1751-1774		95
821	On the subdomain-Galerkin/least squares method for 2- and 3-D mixed elliptic problems with reaction terms. **2002**, 18, 738-751		
820	Some further properties of the superconvergent flux projection. **2002**, 18, 241-250		13
819	A comparison between new adaptive remeshing strategies based on point wise stress error estimation and energy norm error estimation. **2002**, 18, 469-482		10
818	Conserving Galerkin weak formulations for computational fracture mechanics. **2002**, 18, 835-850		7
817	Finite element approximations of parametrized strongly nonlinear boundary value problems. **2002**, 19, 377-398		
816	Iterative schemes for mixed finite element methods with applications to elasticity and compressible flow problems. *Numerische Mathematik*, **2002**, 93, 177-200	2.2	5

815	Spline smoothing over difficult regions. **2002**, 64, 307-319	71
814	Identification of finite dimensional models of infinite dimensional dynamical systems. **2002**, 38, 1851-1865	73
813	Galerkin Approximations for the Linear Parabolic Equation with the Third Boundary Condition. **2003**, 48, 111-128	
812	Multi-scale analysis for the structure of composite materials with small periodic configuration under condition of coupled thermoelasticity. **2003**, 19, 585-592	7
811	The segment projection method for interface tracking. **2003**, 56, 47-79	25
810	Using finite element tools in proving shift theorems for elliptic boundary value problems. **2003**, 10, 33-64	18
809	On preconditioners for mortar discretization of elliptic problems. **2003**, 10, 65-82	7
808	A reproducing kernel method with nodal interpolation property. **2003**, 56, 935-960	70
807	Numerical methods and error analysis for one dimensional elliptic problems containing singularities. **2003**, 19, 399-420	1
806	Lp error estimates and superconvergence for covolume or finite volume element methods. **2003**, 19, 463-486	44

613	On the stability of meshless symmetric collocation for boundary value problems. **2007**, 47, 455-468		13
612	A computational method for approximating a Darcy–Stokes system governing a vuggy porous medium. **2007**, 11, 207-218		157
611	A coupling of mixed and continuous Galerkin finite element methods for poroelasticity II: the discrete-in-time case. **2007**, 11, 145-158		97
610	A coupling of mixed and continuous Galerkin finite element methods for poroelasticity I: the continuous in time case. **2007**, 11, 131-144		156
609	A quadrilateral nonconforming finite element for linear elasticity problem. **2007**, 28, 81-100		10
608	Superconvergence analysis of lower order anisotropic finite element. **2007**, 28, 1119-1130		1
607	H 1-interpolation on quadrilateral and hexahedral meshes with hanging nodes. **2007**, 80, 203-220		13
606	Additive Schwarz with aggregation-based coarsening for elliptic problems with highly variable coefficients. **2007**, 80, 319-343		35
605	Automating the Finite Element Method. **2007**, 14, 93-138		59
604	A locally conservative finite element framework for the simulation of coupled flow and reservoir geomechanics. **2007**, 2, 139-153		104
603	Finite-difference schemes for reaction-diffusion equations modeling predator-prey interactions in MATLAB. **2007**, 69, 931-56		191
602	Error estimates for the numerical approximation of Neumann control problems. **2008**, 39, 265-295		34
601	A coupling of mixed and discontinuous Galerkin finite-element methods for poroelasticity. **2008**, 12, 417-435		95
600	Finite Element Method and Discontinuous Galerkin Method for Stochastic Scattering Problem of Helmholtz Type in Rd (d = 2, 3). **2008**, 28, 301-319		10

599	Analytical and numerical treatment of a dynamic crack model. **2008**, 152, 97-125		5
598	A posteriori error estimates for mixed finite element approximations of elliptic problems. *Numerische Mathematik*, **2008**, 108, 487-500	2.2	34
597	A residual based error estimator for the Mimetic Finite Difference method. *Numerische Mathematik* , **2008**, 108, 387-406	2.2	42
596	Characterizing the inf-sup condition on product spaces. *Numerische Mathematik*, **2008**, 109, 209-231	2.2	13
595	Interpolation theory of anisotropic finite elements and applications. **2008**, 51, 1361-1375		3
594	Residual-based a posteriori error estimates of nonconforming finite element method for elliptic problems with Dirac delta source terms. **2008**, 51, 1440-1460		6
593	Analysis of extrapolation cascadic multigrid method (EXCMG). **2008**, 51, 1349-1360		23
592	A locking-free anisotropic nonconforming rectangular finite element approximation for the planar elasticity problem. **2008**, 23, 9-18		2
591	An FEM approximation for a fourth-order variational inequality of second kind. **2008**, 23, 19-24		
590	Algebraic Pressure Segregation Methods for the Incompressible Navier-Stokes Equations. **2008**, 15, 343-369		18
589	Asymptotics for the voltage potential in a periodic network with localized defects. **2008**, 31, 1175-1196		
588	Convergence and superconvergence analysis of an anisotropic nonconforming finite element methods for semisingularly perturbed reaction□diffusion problems. **2008**, 31, 1387-1407		
587	H(curl) auxiliary mesh preconditioning. **2008**, 15, 455-471		9
586	A time-independent approach for computing wave functions of the Schr□inger□oisson system. **2008**, 15, 55-82		2
585	Uniform convergence of the multigrid V-cycle on graded meshes for corner singularities. **2008**, 15, 291-306		20
584	NURBS-enhanced finite element method (NEFEM). **2008**, 76, 56-83		136
583	An a posteriori error estimator for the mimetic finite difference approximation of elliptic problems. **2008**, 76, 1696-1723		39
582	Numerical analysis and computational testing of a high accuracy Leray-deconvolution model of turbulence. **2008**, 24, 555-582		63

581	Equilibrated error estimators for discontinuous Galerkin methods. **2008**, 24, 1236-1252		27
580	Pressure segregation methods based on a discrete pressure Poisson equation. An algebraic approach. **2008**, 56, 351-382		10
579	An upwind finite-volume element scheme and its maximum-principle-preserving property for nonlinear convection□diffusion problem. **2008**, 56, 2301-2320		12
578	Implicit symmetrized streamfunction formulations of magnetohydrodynamics. **2008**, 58, 1201-1222		4
577	Mixed Finite Element Methods. **2008**, 1-44		7
576	A V-cycle multigrid method for a viscoelastic fluid flow satisfying an Oldroyd-B-type constitutive equation. **2008**, 1, 69-78		
575	An Adaptive Multigrid method for modeling photon transport through biological tissues in bioluminescence tomography. **2008**, 2008, 462-5		1
574	Subspace Interpolation with Applications to Elliptic Regularity. **2008**, 29, 88-114		4
573	Tracing Streamlines on Unstructured Grids From Finite Volume Discretizations. **2008**, 13, 423-431		12
572	Analysis of periodic Schr□inger operators: Regularity and approximation of eigenfunctions. **2008**, 49, 083501		10
571	A C1-P2 finite element without nodal basis. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2008**, 42, 175-192	1.8	15
570	Convergent finite element discretizations of the nonstationary incompressible magnetohydrodynamics system. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2008**, 42, 1065-1087	1.8	68
569	Convergence of a Lagrange-Galerkin method for a fluid-rigid body system in ALE formulation. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2008**, 42, 609-644	1.8	7
568	Stability and convergence of two discrete schemes for a degenerate solutal non-isothermal phase-field model. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2009**, 43, 563-589	1.8	1
567	A MIXED ADAPTIVE VARIATIONAL MULTISCALE METHOD WITH APPLICATIONS IN OIL RESERVOIR SIMULATION. **2009**, 19, 1017-1042		10
566	On Two Iterative Least-Squares Finite Element Schemes for the Incompressible Navier□tokes Problem. **2009**, 30, 436-461		1
565	An adaptive variational multiscale method for convection□diffusion problems. **2009**, 25, 65-79		21
564	Approximate imposition of boundary conditions in immersed boundary methods. **2009**, 80, 1379-1405		27

563	Graded Galerkin methods for the high-order convection-diffusion problem. **2009**, 25, 1261-1282		4
562	The boundary element method with Lagrangian multipliers. **2009**, 25, 1303-1319		14
561	A numerical verification for an unconditionally stable FEM for elastodynamics. **2009**, 43, 223-237		
560	An extended Galerkin weak form and a point interpolation method with continuous strain field and superconvergence using triangular mesh. **2009**, 43, 651-673		25
559	Postprocessing and higher order convergence for the mixed finite element approximations of the Stokes eigenvalue problems. **2009**, 54, 237-250		21
558	Mathematical advances and horizons for classical and quantum-perturbed drift-diffusion systems: solid state devices and beyond. **2009**, 8, 132-141		3
557	Overcoming the problem of locking in linear elasticity and poroelasticity: an heuristic approach. **2009**, 13, 5-12		71
556	Modeling the Behavior of Heat-Shrinkable Thin Films. **2009**, 95, 57-77		0
555	Unified Formulation for High-Order Streamline Tracing on Two-Dimensional Unstructured Grids. *Journal of Scientific Computing*, **2009**, 38, 50-73	2.3	17
554	Uniformly Convergent Iterative Methods for Discontinuous Galerkin Discretizations. *Journal of Scientific Computing*, **2009**, 40, 4-36	2.3	31
553	Local flux mimetic finite difference methods. *Numerische Mathematik*, **2009**, 112, 115-152	2.2	99
552	Discontinuous Galerkin least-squares finite element methods for singularly perturbed reaction-diffusion problems with discontinuous coefficients and boundary singularities. *Numerische Mathematik*, **2009**, 112, 295-318	2.2	12
551	Convergence analysis of the high-order mimetic finite difference method. *Numerische Mathematik*, **2009**, 113, 325-356	2.2	50
550	A residual-type a posteriori error estimate of finite volume element method for a quasi-linear elliptic problem. *Numerische Mathematik*, **2009**, 114, 107-132	2.2	15
549	The operator equations of Lippmann–Schwinger type for acoustic and electromagnetic scattering problems inL2. *Applicable Analysis*, **2009**, 88, 807-830	0.8	21
548	Finite Element Techniques for Removing the Mixture of Gaussian and Impulsive Noise. **2009**, 57, 2538-2547		11
547	Least-Squares Spectral Element Methods in Computational Fluid Dynamics. *Lecture Notes in Computational Science and Engineering*, **2009**, 179-227	0.3	6
546	Beyond Lack of Compactness and Lack of Stability of a Coupled Parabolic-Hyperbolic Fluid-Structure System. **2009**, 1-33		4

545	Real-Space and Multigrid Methods in Computational Chemistry. **2009**, 223-285		3
544	Solving the Helmholtz equation using meshless kernel-based methods. **2009**,		
543	Mimetic finite differences for elliptic problems. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2009**, 43, 277-295	1.8	140
542	Symplectic Pontryagin approximations for optimal design. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2009**, 43, 3-32	1.8	3
541	Fully-discrete finite element approximations for a fourth-order linear stochastic parabolic equation with additive space-time white noise. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2010**, 44, 289-322	1.8	13
540	Literaturnachweis. **2010**, 213-216		
539	Error estimate of the P 1 nonconforming finite element method for the penalized unsteady Navier-Stokes equations. *Numerische Mathematik*, **2010**, 115, 261-287	2.2	8
538	Discontinuous Galerkin methods for the linear Schrödinger equation in non-cylindrical domains. *Numerische Mathematik*, **2010**, 115, 585-608	2.2	9
537	Sampling inequalities for infinitely smooth functions, with applications to interpolation and machine learning. **2010**, 32, 103-129		31
536	Extrapolation and superconvergence of the Steklov eigenvalue problem. **2010**, 33, 25-44		23
535	Error analysis of finite element approximations of the stochastic Stokes equations. **2010**, 33, 215-230		10
534	Nonconforming finite elements for the equation of planar elasticity. **2010**, 31, 1537-1548		
533	Two-grid algorithms for some linear and nonlinear elliptic systems. **2010**, 89, 69-86		6
532	Finite central difference/finite element approximations for parabolic integro-differential equations. **2010**, 90, 89-111		35

404	A Posteriori Error Estimation. **2013**, 173-193		
403	An iterative adaptive hp-FEM method for non-symmetric elliptic eigenvalue problems. **2013**, 95, 183-213		3
402	A cheapest nonconforming rectangular finite element for the stationary Stokes problem. **2013**, 257, 77-86		6

401	SOLENOIDAL LIPSCHITZ TRUNCATION FOR PARABOLIC PDEs. **2013**, 23, 2671-2700		38
400	Focusing light in a bianisotropic slab with negatively refracting materials. **2013**, 25, 135901		2
399	Finite element method for a class of parabolic integro-differential equations with interfaces. **2013**, 44, 823-847		1
398	A locking-free locally conservative hybridized scheme for elasticity problems. **2013**, 30, 585-603		5
397	Energy estimates and numerical verification of the stabilized Domain Decomposition Finite Element/Finite Difference approach for time-dependent Maxwell system. **2013**, 11,		16
396	Anisotropic interpolation error estimates via orthogonal expansions. **2013**, 11,		
395	A posteriori error estimator for eigenvalue problems by mixed finite element method. **2013**, 56, 887-900		7
394	Digital-Discrete Methods for Data Reconstruction. **2013**, 99-122		
393	A Finite Element Recovery Approach to Eigenvalue Approximations with Applications to Electronic Structure Calculations. *Journal of Scientific Computing*, **2013**, 55, 432-454	2.3	1
392	On relaxation times in the Navier-Stokes-Voigt model. **2013**, 27, 184-187		14
391	H 1 space-time discontinuous finite element method for convection-diffusion equations. **2013**, 34, 371-384		
390	L p Error estimate for minimal norm SBF interpolation. **2013**, 2013,		1
389	A priori error estimates for the finite element discretization of optimal distributed control problems governed by the biharmonic operator. **2013**, 50, 165-193		7
388	ANALYSIS OF STABILIZED FINITE VOLUME METHOD FOR POISSON EQUATION. **2013**, 18, 415-431		1
387	Fully Discrete Finite Element Approximation for the Stabilized Gauge-Uzawa Method to Solve the Boussinesq Equations. **2013**, 2013, 1-21		
386	Automatically inf sup compliant diamond-mixed finite elements for Kirchhoff plates. **2013**, 96, 405-424		1
385	Discontinuous Galerkin and multiscale variational schemes for a coupled damped nonlinear system of Schrdinger equations. **2013**, 29, n/a-n/a		3
384	Finite volume element method for monotone nonlinear elliptic problems. **2013**, 29, 1097-1120		7

383	New Finite Element Method for Solving a Wave Equation with a Nonlocal Conservation Condition. **2013**, 42, 41-62		1
382	A subgrid stabilization finite element method for incompressible magnetohydrodynamics. **2013**, 90, 1506-1523		10
381	An Error Analysis for the Finite Element Approximation to the Steady-State Poisson-Nernst-Planck Equations. **2013**, 5, 113-130		12
380	Quadratic finite elements with non-matching grids for the unilateral boundary contact. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2013**, 47, 1185-1205	1.8	5
379	A piecewiseP2-nonconforming quadrilateral finite element. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2013**, 47, 689-715	1.8	9
378	A priorierror analysis of a fully-mixed finite element method for a two-dimensional fluid-solid interaction problem. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2013**, 47, 471-506	1.8	6
377	Two-Level Stabilized Finite Volume Methods for the Stationary Navier-Stokes Equations. **2013**, 5, 19-35		3
376	The Constants in A Posteriori Error Indicator for State-Constrained Optimal Control Problems with Spectral Methods. **2014**, 2014, 1-8		2
375	A linear backward Euler scheme for a class of degenerate advection□diffusion equations: A mathematical analysis of the convergence in L□(0, T0;L2(□)) and in L2(0, T0;H1(□)). **2014**, 12, 227-249		1
374	Finite element methods for coefficient identification in an elliptic equation. *Applicable Analysis*, **2014**, 93, 1533-1566	0.8	5
373	Efficient inversion of three-dimensional finite element models of volcano deformation. **2014**, 196, 1441-1454		13
372	Reconstruction of shapes and refractive indices from backscattering experimental data using the adaptivity. **2014**, 30, 105007		23
371	Coupling of mixed finite element and stabilized boundary element methods for a fluid□solid interaction problem in 3D. **2014**, 30, 1211-1233		11
370	A Meyers type regularity result for approximations of second order elliptic operators by P1 finite elements. **2014**, 287, 498-517		
369	Error estimates for approximations of a gradient dynamics for phase field elastic bending energy of vesicle membrane deformation. **2014**, 37, 913-930		2
368	Boundary element methods for variational inequalities. *Numerische Mathematik*, **2014**, 126, 173-197	2.2	14
367	A finite element method for a biharmonic equation based on gradient recovery operators. **2014**, 54, 469-484		9
366	Improved Exponential Convergence Rates by Oversampling Near the Boundary. **2014**, 39, 323-341		8

365	A Multigrid Method for Helmholtz Transmission Eigenvalue Problems. *Journal of Scientific Computing*, **2014**, 60, 276-294	2.3	39
364	On the parameter choice in grad-div stabilization for the Stokes equations. **2014**, 40, 491-516		53
363	Solving Negative Order Equations by the Multigrid Method Via Variable Substitution. *Journal of Scientific Computing*, **2014**, 59, 371-385	2.3	2
362	Robust and scalable 3-D geo-electromagnetic modelling approach using the finite element method. **2014**, 198, 110-125		40
361	A nonconforming finite element method for the Stokes equations using the Crouzeix-Raviart element for the velocity and the standard linear element for the pressure. **2014**, 74, 222-228		3
360	New error estimates of nonconforming mixed finite element methods for the Stokes problem. **2014**, 37, 937-951		3
359	Some superconvergence results of high-degree finite element method for a second order elliptic equation with variable coefficients. **2014**, 12,		
358	Numerical solution for a parabolic obstacle problem with nonsmooth initial data. **2014**, 30, 1740-1754		7
357	Two-sided bounds of eigenvalues of second-and fourth-order elliptic operators. **2014**, 59, 371-390		3
356	Microstructures in Low-Hysteresis Shape Memory Alloys: Scaling Regimes and Optimal Needle Shapes. **2014**, 213, 355-421		20
355	A posterior error analysis for the nonconforming discretization of Stokes eigenvalue problem. **2014** , 30, 949-967		4
354	Analysis of three stabilized finite volume iterative methods for the steady Navier–Stokes equations. **2014**, 91, 1329-1350		
353	A multi-level correction scheme for eigenvalue problems. **2014**, 84, 71-88		55
352	A mixed variational formulation for the wellposedness and numerical approximation of a PDE model arising in a 3-D fluid-structure interaction. **2014**, 3, 557-578		4
351	Using Cylindrical Algebraic Decomposition and Local Fourier Analysis to Study Numerical Methods: Two Examples. **2014**,		
350	Error Analysis for a Chimera Scheme with Schwarz Iteration. **2014**,		2
349	A Multilevel Correction Method for Steklov Eigenvalue Problem by Nonconforming Finite Element Methods. **2015**, 8, 383-405		12
348	Sparse Collocation Methods for Stochastic Interpolation and Quadrature. **2015**, 1-46		

347	Residuala posteriorierror estimation for the Virtual Element Method for elliptic problems. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2015**, 49, 577-599	1.8	58
346	Modified two-grid method for solving coupled Navier-Stokes/Darcy model based on Newton iteration. **2015**, 30, 127-140		3
345	Comparison of multigrid algorithms for high-order continuous finite element discretizations. **2015**, 22, 664-680		26
344	A multilevel correction method for Stokes eigenvalue problems and its applications. **2015**, 38, 4540-4552		4
343	Analysis of an Unconditionally Convergent Stabilized Finite Element Formulation for Incompressible Magnetohydrodynamics. **2015**, 22, 621-636		15
342	A type of multi-level correction scheme for eigenvalue problems by nonconforming finite element methods. **2015**, 55, 1243-1266		4
341	Simple finite element methods for approximating predator-prey dynamics in two dimensions using MATLAB. **2015**, 77, 548-78		20
340	Convergence analysis for Backward-Euler and mixed discontinuous Galerkin methods for the Vlasov-Poisson system. **2015**, 41, 833-852		0
339	An energy space finite element approach for elliptic Dirichlet boundary control problems. *Numerische Mathematik*, **2015**, 129, 723-748	2.2	22
338	Error estimates for the discretization of the velocity tracking problem. *Numerische Mathematik*, **2015**, 130, 615-643	2.2	6
337	Acceleration of stabilized finite element discretizations for the Stokes eigenvalue problem. **2015**, 41, 799-812		7
336	A multigrid method for eigenvalue problems based on shifted-inverse power technique. **2015**, 1, 207-228		5
335	Discontinuous Petrov-Galerkin and Bernstein-Legendre Polynomials Method for Solving Fractional Damped Heat- and Wave-like Equations. **2015**, 44, 1-23		1
334	Sensitivity Analysis and Computations of the Time Relaxation Model. **2015**, 7, 89-115		3
333	The a Posteriori Error Estimates for Chebyshev-Galerkin Spectral Methods in One Dimension. **2015**, 7, 145-157		1
332	P 1-nonconforming triangular finite element method for elliptic and parabolic interface problems. **2015**, 36, 1197-1212		4
331	Multilevel correction adaptive finite element method for semilinear elliptic equation. **2015**, 60, 527-550		5
330	A modified weak Galerkin finite element methods for convection□diffusion problems in 2D. **2015**, 49, 493-511		10

329	Mimetic finite difference approximation of quasilinear elliptic problems. **2015**, 52, 45-67		10
328	Gradient schemes for linear and non-linear elasticity equations. *Numerische Mathematik*, **2015**, 129, 251-277	2.27	12
327	Integral control for population management. **2015**, 70, 1015-63		7
326	Numerical Approximation of the Singularly Perturbed Heat Equation in a Circle. *Journal of Scientific Computing*, **2015**, 62, 1-24	2.3	2
325	On a nonoverlapping additive Schwarz method for h-p discontinuous Galerkin discretization of elliptic problems. **2016**, 32, 1572-1590		2
324	A C0-weak Galerkin finite element method for fourth-order elliptic problems. **2016**, 32, 1090-1104		2
323	Optimal Control for the Thin Film Equation: Convergence of a Multi-Parameter Approach to Track State Constraints Avoiding Degeneracies. *Computational Methods in Applied Mathematics*, **2016**, 16, 685-702	1.2	
322	Higher-order finite element methods for elliptic problems with interfaces. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2016**, 50, 1561-1583	1.8	18
321	The arbitrary order mixed mimetic finite difference method for the diffusion equation. *ESAIM: Mathematical Modelling and Numerical Analysis*, **2016**, 50, 851-877	1.8	10
320	Tutorial on Hybridizable Discontinuous Galerkin (HDG) for Second-Order Elliptic Problems. **2016**, 105-129		16
319	On Solving the Singular System Arisen from Poisson Equation with Neumann Boundary Condition. *Journal of Scientific Computing*, **2016**, 69, 391-405	2.3	7
318	A Nonconforming Finite Element Approximation for Optimal Control of an Obstacle Problem. *Computational Methods in Applied Mathematics*, **2016**, 16, 653-666	1.2	3
317	Finite Volume Element Methods for Two-Dimensional Three-Temperature Radiation Diffusion Equations. **2016**, 9, 470-496		
316	A posteriori error estimates of stabilized finite volume method for the Stokes equations. **2016**, 39, 32-43		1
315	A full multigrid method for nonlinear eigenvalue problems. **2016**, 59, 2037-2048		24
314	The nonconforming virtual element method. *ESAIM: Mathematical Modelling and Numerical Analysis* , **2016**, 50, 879-904	1.8	123
313	Hermitian finite element complementing the Bogner–Fox–Schmit rectangle near curvilinear boundary. **2016**, 37, 527-533		1
312	A Multigrid Method for Ground State Solution of Bose-Einstein Condensates. **2016**, 19, 648-662		11

311	Optimal Error Estimates of Linearized Crank–Nicolson Galerkin Method for Landau–Lifshitz Equation. *Journal of Scientific Computing*, **2016**, 69, 1-27	2.3	26
310	Theoretical Error Analysis of Direct Overset Finite Element Methods. **2016**,		1
309	TheA-Stokes approximation for non-stationary problems. **2016**, 67, 201-231		2
308	Matrix coefficient identification in an elliptic equation with the convex energy functional method. **2016**, 32, 085007		5
307	A Galerkin finite element scheme for time–space fractional diffusion equation. **2016**, 93, 1212-1225		7
306	A finite element method for the inverse problem of boundary data recovery in an oxygen balance model. **2016**, 24,		
305	A posteriori error estimates of finite element method for the time-dependent Oseen equations. *Applicable Analysis*, **2016**, 95, 1144-1163	0.8	2
304	Dirichlet control of elliptic state constrained problems. **2016**, 63, 825-853		10
303	Sharp stability and approximation estimates for symmetric saddle point systems. *Applicable Analysis*, **2016**, 95, 226-237	0.8	1
302	Pointwise Error Estimates and Two-Grid Algorithms of Discontinuous Galerkin Method for Strongly Nonlinear Elliptic Problems. *Journal of Scientific Computing*, **2016**, 67, 153-175	2.3	5
301	A Galerkin Finite Element Method for a Class of Time–Space Fractional Differential Equation with Nonsmooth Data. *Journal of Scientific Computing*, **2017**, 70, 386-406	2.3	7
300	Noether-Type Discrete Conserved Quantities Arising from a Finite Element Approximation of a Variational Problem. **2017**, 17, 729-762		1
299	Superconvergence of immersed finite element methods for interface problems. **2017**, 43, 795-821		16
298	A Multilevel Correction Method for Interior Transmission Eigenvalue Problem. *Journal of Scientific Computing*, **2017**, 72, 586-604	2.3	5
297	A mixed-type Galerkin variational formulation and fast algorithms for variable-coefficient fractional diffusion equations. **2017**, 40, 5018-5034		21
296	A Method for Linearization of a Beam Problem. *Lecture Notes in Computer Science*, **2017**, 180-186	0.9	1
295	A Finite Element Method for High-Contrast Interface Problems with Error Estimates Independent of Contrast. *Journal of Scientific Computing*, **2017**, 73, 330-365	2.3	18
294	A space-time continuous Galerkin method with mesh modification for viscoelastic wave equations. **2017**, 33, 1183-1207		6

293	A NEW MINIMIZATION PRINCIPLE FOR THE POISSON EQUATION LEADING TO A FLEXIBLE FINITE ELEMENT APPROACH. **2017**, 59, 232-239		
292	Computable Error Estimates for a Nonsymmetric Eigenvalue Problem. **2017**, 7, 583-602		5
291	One Hundred Years of the Galerkin Method. *Computational Methods in Applied Mathematics*, **2017**, 17, 351-357	1.2	7
290	Adaptive finite element method in nanophotonic simulations. **2017**,		
289	Superconvergence of Immersed Finite Volume Methods for One-Dimensional Interface Problems. *Journal of Scientific Computing*, **2017**, 73, 543-565	2.3	10
288	Inversion of geophysical potential field data using the finite element method. **2017**, 33, 125009		4
287	Decoupled, Unconditionally Stable, Higher Order Discretizations for MHD Flow Simulation. *Journal of Scientific Computing*, **2017**, 71, 21-43	2.3	9
286	Least squares overset finite element method for scalar hyperbolic problems in 2D. **2017**,		
285	Adaptive unified continuum FEM modeling of a 3D FSI benchmark problem. **2017**, 33, e2851		4
284	A mixed virtual element method for the pseudostress–velocity formulation of the Stokes problem. **2017**, 37, 296-331		63
283	Nitsche's Method For Helmholtz Problems with Embedded Interfaces. **2017**, 110, 618-636		9
282	A new three-field formulation of the biharmonic problem and its finite element discretization. **2017**, 33, 199-217		2
281	Regularity theory and high order numerical methods for the (1D)-fractional Laplacian. **2017**, 87, 1821-1857		27
280	Mixed Finite Element Methods. **2017**, 1-53		5
279	Interpolation and Quasi-Interpolation in h - and hp -Version Finite Element Spaces. **2017**, 1-33		0
278	Variational formulation and efficient implementation for solving the tempered fractional problems. **2018**, 34, 1224-1257		12
277	A Bivariate Spline Method for Second Order Elliptic Equations in Non-divergence Form. *Journal of Scientific Computing*, **2018**, 75, 803-829	2.3	1
276	Electrical Resistivity Tomography using a finite element based BFGS algorithm with algebraic multigrid preconditioning. **2018**, 212, 2073-2087		9

275	The Morley-Type Virtual Element for Plate Bending Problems. *Journal of Scientific Computing*, **2018**, 76, 610-629	2.3	25
274	Explicit lower bounds for Stokes eigenvalue problems by using nonconforming finite elements. **2018**, 35, 335-354		9
273	A posteriori error estimates for fully discrete schemes for the time dependent Stokes problem. **2018**, 55, 1		1
272	Implicitly enriched Galerkin methods for numerical solutions of fourth-order partial differential equations containing singularities. **2018**, 34, 2079-2112		3
271	Non-unified Compact Residual-Distribution Methods for Scalar Advection Diffusion Problems. *Journal of Scientific Computing*, **2018**, 76, 1521-1546	2.3	5
270	New cascadic multigrid methods for two-dimensional Poisson problem based on the fourth-order compact difference scheme. **2018**, 41, 920-928		4
269	Analysis of two decoupled time-stepping finite-element methods for incompressible fluids with microstructure. **2018**, 95, 686-709		3
268	Numerical study of the Navier Stokes- deconvolution model with pointwise mass conservation. **2018**, 95, 1727-1760		2
267	Optimal Error Estimates of Semi-implicit Galerkin Method for Time-Dependent Nematic Liquid Crystal Flows. *Journal of Scientific Computing*, **2018**, 74, 979-1008	2.3	6
266	A Study on the Galerkin Least-Squares Method for the Oldroyd-B Model. *Computational Methods in Applied Mathematics*, **2018**, 18, 181-198	1.2	
265	Identifying conductivity in electrical impedance tomography with total variation regularization. *Numerische Mathematik*, **2018**, 138, 723-765	2.2	20
264	Composite-grid multigrid for diffusion on the sphere. **2018**, 25, e2115		
263	An explicitly uncoupled VMS stabilization finite element method for the time-dependent Darcy-Brinkman equations in double-diffusive convection. *Numerical Algorithms*, **2018**, 78, 569-597	2.1	8
262	A Priori Error Estimates and Computational Studies for a Fermi Pencil-Beam Equation. **2018**, 47, 125-151		
261	A new stability parameter in streamline upwind meshless Petrov Galerkin method for convection diffusion problems at large Peclet number. **2018**, 74, 746-764		5
260	Bicubic Hermite Elements in a Domain with the Curved Boundary. **2018**, 39, 893-903		2
259	Theoretical Analysis of a Partition of Unity Direct Overset Finite Element Method.. **2018**,		
258	A Spectral Method for the Biharmonic Equation. **2018**, 97-118		

257	Solving Partial Differential Equations with Multiscale Radial Basis Functions. **2018**, 1191-1213		1
256	Qualitative, Approximate and Numerical Approaches for the Solution of Nonlinear Differential Equations. **2018**, 611-664		1
255	Numerical studies of serendipity and tensor product elements for eigenvalue problems. **2018**, 11, 661-678
