

COMPLEMENT-FIXATION TITERS IN EXPERIMENTAL

Journal of Bacteriology

88, 233-241

DOI: 10.1128/jb.88.1.233-241.1964

Citation Report

#	ARTICLE	IF	CITATIONS
1	A serological comparison of the three morphological phases of <i>Coccidioides immitis</i> : Complement fixation tests with a Pooled antiserum obtained from rabbits with experimental Coccidioidomycosis. <i>Mycopathologia</i> , 1968, 34, 289-295.	3.1	2
2	Erzeugung von Krankheitszuständen durch Sproßpilze und Schimmelpilze. , 1967, , 1-290.		2
3	Experimentally induced immunity in the mycoses. <i>Bacteriological Reviews</i> , 1967, 31, 35-53.	7.0	54
4	Serological Comparison of Spherules and Arthrospores of <i>Coccidioides immitis</i> . <i>Journal of Bacteriology</i> , 1967, 94, 1400-1405.	2.2	10
5	Erzeugung von Krankheitszuständen durch Sproßpilze und Schimmelpilze. , 1967, , 1-290.		0
8	COMPARATIVE SUSCEPTIBILITY OF NEW ZEALAND ALBINO AND DUTCH RABBITS TO EXPERIMENTAL COCCIDIOIDOMYCOSIS. <i>Journal of Bacteriology</i> , 1964, 88, 1813-4.	2.2	0
10	COMPARATIVE SUSCEPTIBILITY OF NEW ZEALAND ALBINO AND DUTCH RABBITS TO EXPERIMENTAL COCCIDIOIDOMYCOSIS. <i>Journal of Bacteriology</i> , 1964, 88, 1813-1814.	2.2	1
