Version: 2024-04-25

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
161	Comparative RNA-Seq transcriptome analyses reveal distinct metabolic pathways in diabetic nerve and kidney disease. 2017 , 21, 2140-2152		33
160	Kidney triglyceride accumulation in the fasted mouse is dependent upon serum free fatty acids. 2017 , 58, 1132-1142		24
