## Risk Factors for Complications after Reduction Mammoplasty: A Meta-Analysis

DOI: 10.1371/journal.pone.0167746  
PLoS ONE, 2016, 11, e0167746.

**Source:** <https://exaly.com/paper-pdf/87039748/citation-report.pdf>

**Version:** 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
