

CITATION REPORT

List of articles citing

Discrimination in lexical decision

DOI: 10.1371/journal.pone.0171935
PLoS ONE, 2017, 12, e0171935.

Version: 2024-04-25

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
68	Models of Lexical Access and Morphological Processing. 2017 , 240-268		9
67	If priming is graded rather than all-or-none, can reactivating abstract structures be the underlying mechanism?. <i>Behavioral and Brain Sciences</i> , 2017 , 40, e287	0.9	2
66	Word and beyond-word issues in morphological processing. <i>Word Structure</i> , 2017 , 10, 235-255	0.6	3
65	Are baboons learning "orthographic" representations? Probably not. <i>PLoS ONE</i> , 2017 , 12, e0183876	3.7	13
64	A database of orthography-semantics consistency (OSC) estimates for 15,017 English words. <i>Behavior Research Methods</i> , 2018 , 50, 1482-1495	6.1	15
63	Testing predictions about the processing of word stress in reading using event-related potentials. <i>Language, Cognition and Neuroscience</i> , 2018 , 33, 424-442	2.4	1
62	Strategies for addressing collinearity in multivariate linguistic data. <i>Journal of Phonetics</i> , 2018 , 71, 249-267		83
61	A facilitatory effect of rich stem allomorphy but not inflectional productivity on single-word recognition. <i>Applied Psycholinguistics</i> , 2018 , 39, 1221-1238	1.4	3
60	Grounding the neurobiology of language in first principles: The necessity of non-language-centric explanations for language comprehension. <i>Cognition</i> , 2018 , 180, 135-157	3.5	79
59	Distributional learning is error-driven: the role of surprise in the acquisition of phonetic categories. <i>Linguistics Vanguard: Multimodal Online Journal</i> , 2018 , 4,	0.8	12
58	Lexical Decision Task for Studying Written Word Recognition in Adults with and without Dementia or Mild Cognitive Impairment. <i>Journal of Visualized Experiments</i> , 2019 ,	1.6	2
57	New Perspectives on the Aging Lexicon. <i>Trends in Cognitive Sciences</i> , 2019 , 23, 686-698	14	47
56	Lexical and Frequency Effects on Keystroke Timing: Challenges to a Lexical Search Account From a Type-To-Copy Task. <i>Frontiers in Communication</i> , 2019 , 4,	2.5	1
55	Analyzing the Time Course of Pupillometric Data. <i>Trends in Hearing</i> , 2019 , 23, 2331216519832483	3.2	48
54	A Processing-Oriented Investigation of Inflectional Complexity. <i>Frontiers in Communication</i> , 2019 , 4,	2.5	6
53	Conceptualizing syntactic categories as semantic categories: Unifying part-of-speech identification and semantics using co-occurrence vector averaging. <i>Behavior Research Methods</i> , 2019 , 51, 1371-1398	6.1	10
52	Effects of morphological family on word recognition in normal aging, mild cognitive impairment, and Alzheimer's disease. <i>Cortex</i> , 2019 , 116, 91-103	3.8	3

51	Semantic Effects in Morphological Priming: The Case of Hebrew Stems. <i>Language and Speech</i> , 2019 , 62, 737-750	1.5	2
50	'Understanding' differs between English and German: Capturing systematic language differences of complex words. <i>Cortex</i> , 2019 , 116, 168-175	3.8	14
49	Opacity, Transparency, and Morphological Priming: A Study of Prefixed Verbs in Dutch. <i>Journal of Memory and Language</i> , 2020 , 110, 104055-104055	3.8	14
48	Of mice and men: Speech sound acquisition as discriminative learning from prediction error, not just statistical tracking. <i>Cognition</i> , 2020 , 197, 104081	3.5	24
47	Scaling Laws for Phonotactic Complexity in Spoken English Language Data. <i>Language and Speech</i> , 2021 , 64, 693-704	1.5	0
46	The processing of pseudoword form and meaning in production and comprehension: A computational modeling approach using linear discriminative learning. <i>Behavior Research Methods</i> , 2021 , 53, 945-976	6.1	19
45	Consistency measures individuate dissociating semantic modulations in priming paradigms: A new look on semantics in the processing of (complex) words. <i>Quarterly Journal of Experimental Psychology</i> , 2020 , 73, 1546-1563	1.8	3
44	The representation of plural inflectional affixes in English: Evidence from priming in an auditory lexical decision task. <i>Language, Cognition and Neuroscience</i> , 2020 , 35, 393-401	2.4	1
43	Perceptual salience of derivational suffixes in visual word recognition. <i>Scandinavian Journal of Psychology</i> , 2020 , 61, 348-360	2.2	0
42	Semantic transparency is not invisibility: A computational model of perceptually-grounded conceptual combination in word processing. <i>Journal of Memory and Language</i> , 2020 , 112, 104104	3.8	6
41	Modeling Morphological Priming in German With Naive Discriminative Learning. <i>Frontiers in Communication</i> , 2020 , 5,	2.5	7
40	Vocabulary Size Influences Spontaneous Speech in Native Language Users: Validating the Use of Automatic Speech Recognition in Individual Differences Research. <i>Language and Speech</i> , 2021 , 64, 35-51	1.5	3
39	What is learned from exposure: an error-driven approach to productivity in language. <i>Language, Cognition and Neuroscience</i> , 2021 , 36, 60-83	2.4	1
38	Bilingual and Multilingual Mental Lexicon: A Modeling Study With Linear Discriminative Learning. <i>Language Learning</i> , 2021 , 71, 219-292	5.1	2
37	Reading morphologically complex words in German: the case of particle and prefixed verbs. <i>Language, Cognition and Neuroscience</i> , 2021 , 36, 255-268	2.4	
36	Phonetic effects of morphology and context: Modeling the duration of word-final S in English with naïve discriminative learning. <i>Journal of Linguistics</i> , 2021 , 57, 123-161	0.6	37
35	Balancing information-structure and semantic constraints on construction choice: building a computational model of passive and passive-like constructions in Mandarin Chinese. <i>Cognitive Linguistics</i> , 2021 , 32, 349-388	1.1	1
34	Direct Versus Indirect Causation as a Semantic Linguistic Universal: Using a Computational Model of English, Hebrew, Hindi, Japanese, and K'iche' Mayan to Predict Grammaticality Judgments in Balinese. <i>Cognitive Science</i> , 2021 , 45, e12974	2.2	

33	We probably sense sense probabilities. <i>Language, Cognition and Neuroscience</i> , 1-28	2.4	2
32	Memory for affixes in a long-lag priming paradigm. <i>Glossa</i> ,	1.2	
31	Prediction and error in early infant speech learning: A speech acquisition model. <i>Cognition</i> , 2021 , 212, 104697	3.5	8
30	LDL-AURIS: a computational model, grounded in error-driven learning, for the comprehension of single spoken words. <i>Language, Cognition and Neuroscience</i> , 1-28	2.4	2
29	Language learning as uncertainty reduction: The role of prediction error in linguistic generalization and item-learning. <i>Journal of Memory and Language</i> , 2021 , 119, 104231	3.8	5
28	Durational Differences of Word-Final /s/ Emerge From the Lexicon: Modelling Morpho-Phonetic Effects in Pseudowords With Linear Discriminative Learning. <i>Frontiers in Psychology</i> , 2021 , 12, 680889	3.4	3
27	Modelling Maltese noun plural classes without morphemes. <i>Language, Cognition and Neuroscience</i> , 1-22	2.4	2
26	A (distributional) semantic perspective on the processing of morphologically complex words. <i>Mental Lexicon</i> , 2020 , 15, 62-78	0.7	7
25	Approaching text genre. <i>Scientific Study of Literature</i> , 2020 , 10, 3-34	0.6	1
24	Words from spontaneous conversational speech can be recognized with human-like accuracy by an error-driven learning algorithm that discriminates between meanings straight from smart acoustic features, bypassing the phoneme as recognition unit. <i>PLoS ONE</i> , 2017 , 12, e0174623	3.7	36
23	Form and Function: A Study on the Distribution of the Inflectional Endings in Italian Nouns and Adjectives. <i>Frontiers in Psychology</i> , 2021 , 12, 720228	3.4	2
22	Root-letter priming in Maltese visual word recognition. <i>Mental Lexicon</i> , 2018 , 13, 1-25	0.7	1
21	Native speakers like affixes, L2 speakers like letters? An overt visual priming study investigating the role of orthography in L2 morphological processing. <i>PLoS ONE</i> , 2019 , 14, e0226482	3.7	1
20	Simulating phonological and semantic impairment of English tense inflection with linear discriminative learning. <i>Mental Lexicon</i> , 2020 , 15, 385-421	0.7	2
19	Generalized Additive Mixed Models. 2020 , 563-591		4
18	Asymmetric Morphological Priming Among Inflected and Derived Verbs and Nouns in Greek. <i>Frontiers in Psychology</i> , 2021 , 12, 658189	3.4	
17	An exploration of error-driven learning in simple two-layer networks from a discriminative learning perspective.. <i>Behavior Research Methods</i> , 2022 , 1	6.1	2
16	What makes the past perfect and the future progressive? Experiential coordinates for a learnable, context-based model of tense and aspect. <i>Cognitive Linguistics</i> , 2022 ,	1.1	0

15	Usage-Based Individual Differences in the Probabilistic Processing of Multi-Word Sequences. <i>Frontiers in Communication</i> , 2021 , 6,	2.5	
14	A discriminative account of the learning, representation and processing of inflection systems. <i>Language, Cognition and Neuroscience</i> , 1-25	2.4	1
13	Data_Sheet_1.pdf. 2019 ,		
12	Presentation_1.pdf. 2020 ,		
11	From decomposition to distributed theories of morphological processing in reading. <i>Psychonomic Bulletin and Review</i> ,	4.1	1
10	COVIDisgust: Language processing through the lens of partisanship. 2022 , 17, e0271206		0
9	All mimsy were the borogoves: A discriminative learning model of morphological knowledge in pseudo-word inflection. 1-18		1
8	Stratification effects without morphological strata, syllable counting effects without counts: Modelling English stress assignment with Naive Discriminative Learning.		1
7	Affix substitution in Indonesian: a computational modeling approach. 2022 ,		0
6	Word knowledge and word usage: a cross-disciplinary guide to the mental lexicon. 1-5		0
5	Lateralized reading in the healthy brain: A behavioral and computational study on the nature of the visual field effect. 2023 , 180, 108468		0
4	Modelling L1 and the artificial language during artificial language learning. 2023 , 14,		0
3	The activation of embedded (pseudo-)stems in auditory lexical processing: implications for models of spoken word recognition. 1-17		0
