Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
61	The Design, Usability, and Feasibility of a Family-Focused Diabetes Self-Care Support mHealth Intervention for Diverse, Low-Income Adults with Type 2 Diabetes. <i>Journal of Diabetes Research</i> , 2016 , 2016, 7586385	3.9	45
60	Review of mobile applications for optimizing the follow-up care of patients with diabetes. <i>Hormones</i> , 2018 , 17, 541-550	3.1	3
59	Identifying and Understanding Barriers and Facilitators to Medication Adherence Among Marshallese Adults in Arkansas. <i>Journal of Pharmacy Technology</i> , 2018 , 34, 204-215	0.6	6
58	Assessing barriers to diabetes medication adherence using the Information-Motivation-Behavioral skills model. <i>Diabetes Research and Clinical Practice</i> , 2018 , 142, 374-384	7.4	27
57	Text messaging to engage friends/family in diabetes self-management support: acceptability and potential to address disparities. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2019 , 26, 1099-1108	8.6	8
56	Beyond the reminder: The next steps in pharmacist-driven, mHealth patient engagement. <i>Journal of the American Pharmacists Association: JAPhA</i> , 2019 , 59, S21-S24	1.7	4
55	The Management of Diabetes in Everyday Life (MODEL) program: development of a tailored text message intervention to improve diabetes self-care activities among underserved African-American adults. <i>Translational Behavioral Medicine</i> , 2020 , 10, 204-212	3.2	7
54	Sociodemographic and clinical correlates of key outcomes from a Mobile Insulin Titration Intervention (MITI) for medically underserved patients. <i>Patient Education and Counseling</i> , 2019 , 102, 520-527	3.1	4
53	Exploring Perceived Barriers to Medication Adherence and the Use of Mobile Technology in Underserved Patients With Chronic Conditions. <i>Journal of Pharmacy Practice</i> , 2019 , 32, 147-153	1.3	8
52	Features of a mobile health intervention to manage chronic obstructive pulmonary disease: a qualitative study. <i>Therapeutic Advances in Respiratory Disease</i> , 2020 , 14, 1753466620951044	4.9	1
51	Theoretical advances in mobile health communication research. 2020 , 151-177		1
50	Self-care of patients with type 2 diabetes mellitus over the course of illness: implications for tailoring support. <i>Journal of Diabetes and Metabolic Disorders</i> , 2020 , 19, 81-89	2.5	2
49	Mixed-Methods Randomized Evaluation of FAMS: A Mobile Phone-Delivered Intervention to Improve Family/Friend Involvement in Adults' Type 2 Diabetes Self-Care. <i>Annals of Behavioral Medicine</i> , 2021 , 55, 165-178	4.5	8
48	Effects of a Tailored Text Messaging Intervention Among Diverse Adults With Type 2 Diabetes: Evidence From the 15-Month REACH Randomized Controlled Trial. <i>Diabetes Care</i> , 2021 , 44, 26-34	14.6	17
47	The My Diabetes Care Patient Portal Intervention: Usability and Pre-Post Assessment. <i>Applied Clinical Informatics</i> , 2021 , 12, 539-550	3.1	1
46	Retaining diverse adults with diabetes in a long-term trial: Strategies, successes, and lessons learned. <i>Contemporary Clinical Trials</i> , 2021 , 105, 106388	2.3	1
45	Factors influencing self-care behavior of socio-economically disadvantaged diabetic patients: A systematic review. <i>Health Psychology Open</i> , 2021 , 8, 20551029211041427	1.9	

44	Mobile Health for Smoking Cessation Among Disadvantaged Young Women During and After Pregnancy: User-Centered Design and Usability Study. <i>JMIR Formative Research</i> , 2021 , 5, e24112	2.5	1
43	Development and Usability of a Text Messaging Program for Women with Gestational Diabetes: Mixed Methods Study (Preprint).		
42	Adults with type 2 diabetes benefit from self-management support intervention regardless of depressive symptoms. <i>Journal of Diabetes and Its Complications</i> , 2021 , 35, 108024	3.2	1
41	Race/Ethnicity Considerations in the Prevention and Treatment of Stroke. <i>Current Treatment Options in Neurology</i> , 2021 , 23, 1	4.4	2
40	Impact of personalized text messages from pharmacists on medication adherence in type 2 diabetes in France: A real-world, randomized, comparative study. <i>Patient Education and Counseling</i> , 2021 , 104, 2250-2258	3.1	1
39	Short Message Service (SMS) e promoções do autocuidado em DM2: revisão integrativa. <i>ACTA Paulista De Enfermagem</i> , 2019 , 32, 210-219	0.7	4
38	Promoting Self-Care of Diabetic Foot Ulcers Through a Mobile Phone App: User-Centered Design and Evaluation. <i>JMIR Diabetes</i> , 2018 , 3, e10105	2.7	28
37	The Iterative Convergent Design for Mobile Health Usability Testing: Mixed Methods Approach. <i>JMIR MHealth and UHealth</i> , 2019 , 7, e11656	5.5	26
36	Perceptions of Health Care Providers Regarding a Mobile Health Intervention to Manage Chronic Obstructive Pulmonary Disease: Qualitative Study. <i>JMIR MHealth and UHealth</i> , 2019 , 7, e13950	5.5	13
35	mHealth and Engagement Concerning Persons With Chronic Somatic Health Conditions: Integrative Literature Review. <i>JMIR MHealth and UHealth</i> , 2020 , 8, e14315	5.5	2
34	Perceptions of Patients Regarding Mobile Health Interventions for the Management of Chronic Obstructive Pulmonary Disease: Mixed Methods Study. <i>JMIR MHealth and UHealth</i> , 2020 , 8, e17409	5.5	5
33	User Engagement Among Diverse Adults in a 12-Month Text Message-Delivered Diabetes Support Intervention: Results from a Randomized Controlled Trial. <i>JMIR MHealth and UHealth</i> , 2020 , 8, e17534	5.5	7
32	Evaluation of a Text Messaging Intervention to Support Self-Management of Diabetes During Pregnancy Among Low-Income, Minority Women: Qualitative Study. <i>JMIR Diabetes</i> , 2020 , 5, e17794	2.7	4
31	Enhancing Patient Activation and Self-Management Activities in Patients With Type 2 Diabetes Using the US Department of Defense Mobile Health Care Environment: Feasibility Study. <i>Journal of Medical Internet Research</i> , 2020 , 22, e17968	7.6	4
30	Predicting Attrition in a Text-Based Nutrition Education Program: Survival Analysis of Text2BHealthy. <i>JMIR MHealth and UHealth</i> , 2019 , 7, e9967	5.5	6
29	Enhancing mHealth Technology in the Patient-Centered Medical Home Environment to Activate Patients With Type 2 Diabetes: A Multisite Feasibility Study Protocol. <i>JMIR Research Protocols</i> , 2017 , 6, e38	2	9
28	Mobile Phone Support for Diabetes Self-Care Among Diverse Adults: Protocol for a Three-Arm Randomized Controlled Trial. <i>JMIR Research Protocols</i> , 2018 , 7, e92	2	20
27	Advantages and limitations of virtual online consultations in a NHS acute trust: the VOCAL mixed-methods study. <i>Health Services and Delivery Research</i> , 2018 , 6, 1-136	1.5	49

26	Text Messaging May Engage and Benefit Adults with Type 2 Diabetes Regardless of Health Literacy Status. <i>Health Literacy Research and Practice</i> , 2017 , 1, e192-e202	2.6	6
25	Mobile Phone Support for Diabetes Self-Care Among Diverse Adults: Protocol for a Three-Arm Randomized Controlled Trial.		
24	Mobile Phone Support for Diabetes Self-Care Among Diverse Adults: Protocol for a Three-Arm Randomized Controlled Trial (Preprint).		
23	Promoting Self-Care of Diabetic Foot Ulcers through a Mobile Application: A User-Centred Design and Evaluation (Preprint).		
22	Predicting Attrition in a Text-Based Nutrition Education Program: Survival Analysis of Text2BHealthy (Preprint).		
21	Perceptions of Health Care Providers Regarding a Mobile Health Intervention to Manage Chronic Obstructive Pulmonary Disease: Qualitative Study (Preprint).		
20	mHealth and Engagement Concerning Persons With Chronic Somatic Health Conditions: Integrative Literature Review (Preprint).		
19	Recommendations for Developing Support Tools With People Suffering From Chronic Obstructive Pulmonary Disease: Co-Design and Pilot Testing of a Mobile Health Prototype (Preprint).		
18	User Engagement Among Diverse Adults in a 12-Month Text Message-Delivered Diabetes Support Intervention: Results from a Randomized Controlled Trial (Preprint).		
17	Recommendations for Developing Support Tools With People Suffering From Chronic Obstructive Pulmonary Disease: Co-Design and Pilot Testing of a Mobile Health Prototype. <i>JMIR Human Factors</i> , 2020 , 7, e16289	2.5	5
16	Evaluation of a Text Messaging Intervention to Support Self-Management of Diabetes During Pregnancy Among Low-Income, Minority Women: Qualitative Study (Preprint).		
15	Leveraging Technology to Improve Diabetes Care in Pregnancy. <i>Clinical Diabetes</i> , 2020 , 38, 486-494	2.9	
14	Agile science: what and how in digital diabetes research. 2020 , 51-63		2
13	Mobile Health for Smoking Cessation Among Disadvantaged Young Women During and After Pregnancy: User-Centered Design and Usability Study (Preprint).		
12	Development and Usability of a Text Messaging Program for Women With Gestational Diabetes: Mixed Methods Study.. <i>JMIR Human Factors</i> , 2022 , 9, e32815	2.5	0
11	Smartphone Ownership and Use among Diverse Older Adult New York City Housing Authority Residents: A Cross-Sectional Pilot Survey (Preprint).
