Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
358	Evaluation of postoperative recovery in day surgery patients using a mobile phone application: a multicentre randomized trial. 2017 , 119, 1030-1038		50
357	A smooth and smart integrated mobile concept for parallelizing and "virtualizing" the Austrian health ID card. 2017 ,		
356	Treatment of adolescent obesity. 2018 , 14, 331-344		68
355	Development and Validation of a Tool to Measure Dietitians' Self-Efficacy with Using Mobile Health Apps in Dietetic Practice. 2018 , 50, 468-475.e1		3
354	Digital Diabetes Management Application Improves Glycemic Outcomes in People With Type 1 and Type 2 Diabetes. 2018 , 12, 701-708		30
353	Re: Treatment of stress urinary incontinence with a mobile app: factors associated with success. 2018 , 29, 925		1
352	Interest in a Mobile App for Two-Way Risk Communication: A Survey Study Among European Healthcare Professionals and Patients. 2018 , 41, 697-712		11
351	Gender Similarities and Differences for e-Health Behaviors Among U.S. Adults. 2018 , 24, 335-343		34
350	Interaction with touchscreen smartphones in patients with essential tremor and healthy individuals. 2021 , 36, 657-665		0
349	Increasing Health Care Adherence Through Gamification, Video Feedback, and Real-World Rewards. 2018 , 2018, 1584-1587		3
348	Users' preferences and design recommendations to promote engagements with mobile apps for diabetes self-management: Multi-national perspectives. 2018 , 13, e0208942		26
347	Mobile health apps preferences and practice among ambulatory cardiovascular patients. 2018 , 14, 381-388		6
346	First Aid Literacy Mobile Application Development. 2018 ,		
345	[Is the discharge letter still relevant? : Chances and risks of "Medical apps" in orthopedics and traumatology]. 2018 , 47, 842-848		6
344	Agile research to complement agile development: a proposal for an mHealth research lifecycle. 2018 , 1, 46		28
343	Using Mobile Technology in Eating Behaviors. 2018 , 101-118		4
342	Interaction with touchscreen smartphones in patients with essential tremor and healthy individuals. 2018 ,		2

341	The future of recovery - Integrated, digitalised and in real time. 2018 , 32, 295-302	
340	Characteristics, Quality and Contribution to Signal Detection of Spontaneous Reports of Adverse Drug Reactions Via the WEB-RADR Mobile Application: A Descriptive Cross-Sectional Study. 2018 , 41, 969-978	9
339	Criteria for assessing the quality of mHealth apps: a systematic review. 2018 , 25, 1089-1098	75
338	Effect of self-monitoring on long-term patient engagement with mobile health applications. 2018 , 13, e0201166	54
337	Predicting which type of push notification content motivates users to engage in a self-monitoring app. 2018 , 11, 267-273	30
336	mHealth and telemedicine apps: in search of a common regulation. 2018 , 12, 853	24
335	Receptiveness and preferences of health-related smartphone applications among Vietnamese youth and young adults. 2018 , 18, 764	37
334	Media Health Literacy, eHealth Literacy, and the Role of the Social Environment in Context. 2018 , 15,	92
333	Differences in mobile health app use: A source of new digital inequalities?. 2018 , 34, 183-193	100
