Version: 2024-04-18

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
111	Evaluation of a Breastfeeding App in Rural Australia: Prospective Cohort Study. 2018 , 34, 711-720		10
110	An overview on the emerging area of identification, characterization, and assessment of health apps. 2018 , 83, 97-102		36
109	The EJES-3D tool for personalized prescription of exercise in axial spondyloarthritis through multimedia animations: pilot study. 2018 , 38, 1277-1284		1
108	Mobile applications providing guidance about decreased fetal movement: Review and content analysis. 2019 , 32, e289-e296		13
107	Patient Education for Overactive Bladder in the Digital Era. 2019 , 14, 186-190		4
106	A trade-off dual-factor model to investigate discontinuous intention of health app users: From the perspective of information disclosure. 2019 , 100, 103302		4
105	Evaluation of user satisfaction and usability of a mobile app for smoking cessation. 2019 , 182, 105042		7
104	Wearables and mobile technologies in Autism Spectrum Disorder interventions: A systematic literature review. 2019 , 66, 101405		33
103	Active 10. 2019 ,		2
102	Spanish adaptation and validation of the Mobile Application Rating Scale questionnaire. 2019 , 129, 95-99		21
101	m-Health, Smartphones, and Apps for Behavioral Health: Human Factors for All Users. 2019 , 4, 124-129		1
100	Client-Centered Mobile Health Care Applications: Using the Mobile Application Rating Scale Instrument for Evidence-Based Evaluation. 2019 , 64, 324-329		11
99	Identifying Mobile Applications Aimed at Self-Management in People With Chronic Kidney Disease. 2019 , 6, 2054358119834283		11
98	The history and future of digital health in the field of behavioral medicine. 2019 , 42, 67-83		55
97	Exploring the Strengths and Weaknesses of Mobile Health Apps. 2019 , 41-67		
96	Relationship between popularity and the likely efficacy: an observational study based on a random selection on top-ranked physical activity apps. 2019 , 9, e027536		8
95	Parenting apps review: in search of good quality apps. 2019 , 5, 44		12

94	The transformation of health care for patients: Information and communication technology, digiceuticals, and digitally enabled care. 2019 , 31, 156-161	7
93	Going digital: a narrative overview of the effects, quality and utility of mobile apps in chronic disease self-management. 2020 , 44, 62-82	36
92	Development of a decision-making checklist tool to support technology selection in digital health research. 2020 , 10, 1004-1015	30
91	Evaluation of mobile apps for treatment of patients at risk of developing gestational diabetes. 2020 , 26, 1983-1994	6
90	The Needle in the Haystack: Identifying Credible Mobile Health Apps for Pediatric Populations during a Pandemic and beyond. 2020 , 45, 1106-1113	17
89	Usability matters for virtual reality simulations teaching communication. 2020 , 54, 1067-1068	2
88	Mobile applications for breast cancer survivorship and self-management: A systematic review. 2020 , 26, 2892-2905	8
87	Patient experience with an educational mobile health application: A pilot study on usability and feasibility in a Saudi population. 2020 , 7, 1843883	0
