CITATION REPORT List of articles citing

Range of adiposity and cardiorenal syndrome

DOI: 10.4239/wjd.v11.i8.322 World Journal of Diabetes, 2020, 11, 322-350.

Source: https://exaly.com/paper-pdf/89848906/citation-report.pdf

Version: 2024-04-20

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
10	Modulation of insulin resistance by renin angiotensin system inhibitors: implications for cardiovascular prevention. <i>Monaldi Archives for Chest Disease</i> , 2021 , 91,	2.7	2
9	The Kidney-Heart Connection in Obesity. <i>Nephron</i> , 2021 , 145, 604-608	3.3	2
8	Adiponectin protects obesity-related glomerulopathy by inhibiting ROS/NF- B /NLRP3 inflammation pathway. <i>BMC Nephrology</i> , 2021 , 22, 218	2.7	4
7	miR-6869-5p Transported by Plasma Extracellular Vesicles Mediates Renal Tubule Injury and Renin-Angiotensin System Activation in Obesity. <i>Frontiers in Medicine</i> , 2021 , 8, 725598	4.9	1
6	The Pathogenesis of End-Stage Renal Disease from the Standpoint of the Theory of General Pathological Processes of Inflammation. <i>International Journal of Molecular Sciences</i> , 2021 , 22,	6.3	6
5	Dietary Patterns Associated with Diabetes in an Older Population from Southern Italy Using an Unsupervised Learning Approach <i>Sensors</i> , 2022 , 22,	3.8	1
4	Beyond the Cardiorenal Syndrome: Pathophysiological Approaches and Biomarkers for Renal and Cardiac Crosstalk <i>Diagnostics</i> , 2022 , 12,	3.8	5
3	Association between hemoglobin and chronic kidney disease progression: a secondary analysis of a prospective cohort study in Japanese patients. 2022 , 23,		
2	Decreased body-fat accumulation and increased vasorelaxation to glyceryl trinitrate in middle-aged male rats following six-weeks consumption of coconut milk protein. 58,		O
1	Carotid baroreceptor stimulation prevents oxidative stress by inhibiting MAO-A and prevents cardiac remodeling in obese rats.		О
